CORSA

CONDENSED BRIEF

JAKARTA TARGET CUSTOMER

Condensed brief: who will buy CORSA in Jakarta, what it means, what to do next

For Samuel Leu, CORSA.
HSG Capstone Team A, Pillar 1 Strategic Fit. Prepared by Tiago Reimann, 8 October 2026.
Condensed from the 11-page customer research report.

A narrow, wealthy niche can carry CORSA

WHY WE LOOKED Scope question: who are the most relevant CORSA customers in Jakarta? Answer first.

THE DATA The headline numbers are the latest found: Jakarta data from Statistics Indonesia (spending, population, 2025) and national data (NielsenIQ health survey 2025, middle class 2019 to 2025). All desk research; no CORSA customer in Jakarta asked yet.

IDR 4.08M
South Jakarta spend per person per month (CHF 190), the highest in Indonesia [2]

48.9%
of Jakarta's 10.72M people are Gen Z or Millennials (about 5.2M) [3]

Only 19%
of Indonesians would pay 20% more for food with added health benefits [4]

-10.6M
Indonesian middle class: 57.3M (2019) to 46.7M (2025) [5]

FIVE TAKEAWAYS [2, 8, 10, 11, 13, 16, 18, 33, 39]

01 Core buyer: health-aware young professionals, 25 to 39, around SCBD (Sudirman Central Business District), Senopati, Kuningan.

02 They choose on price (**60%**) and taste (**59%**); health is not top 10.

03 South Jakarta spends most in Indonesia; staff costs about **18x** below Swiss.

04 Risks: shrinking middle class, mandatory halal, crowded coffee, delivery fees.

05 Discovery runs on friends (**44%**) and TikTok (**40%**); delivery is **55%** promotion-driven.

WHAT CORSA SHOULD DO

1
Model the primary segment in Tier 1 districts: SCBD, Senopati, Kuningan.

2
Use three price levels: entry coffee or snack, core bowl, premium bowl or bundle.

3
Localise: halal, spice, rice or grain option. Keep the brand.

4
Acquire through run and padel clubs; use delivery for discovery.

How to read this. Each page: why, data used, meaning, next. Conclusion: page 11; sources [n]: page 12.

WHAT IT MEANS FOR CORSA

- **Jakarta works in a narrow, wealthy micro-catchment, not citywide.**
- **Win on taste, portion and experience; health is the reason to feel good.**
- **Price and visit frequency are unknown; test both before a lease.**

HOW TO CONTINUE

- **a** Approve the 90-day research plan on page 10.
- **b** Brief Finance and the Location team with the ranking on page 9.
- **c** Ask for a deeper dive on one page first.

Note. No CORSA customer asked yet: willingness to pay and visit frequency are unknown.

Young office professionals come first

WHY WE LOOKED Scope question: which customers near the central business district (CBD) come first?

THE DATA Headcounts are official Jakarta figures (labour, commuter, student and foreign-worker statistics, 2023 to 2025); the desk-worker range is our estimate from CBRE 2026 floor space. Segment scores are team judgement; the map uses our review dataset and OpenStreetMap data.

23 / 30
team score of young CBD professionals, the highest of six segments

3.3M
formal workers in Jakarta [60]

0.94M
people commute into South Jakarta daily [61]

360k to 540k
estimated CBD desk workers (from CBRE floor space) [59]

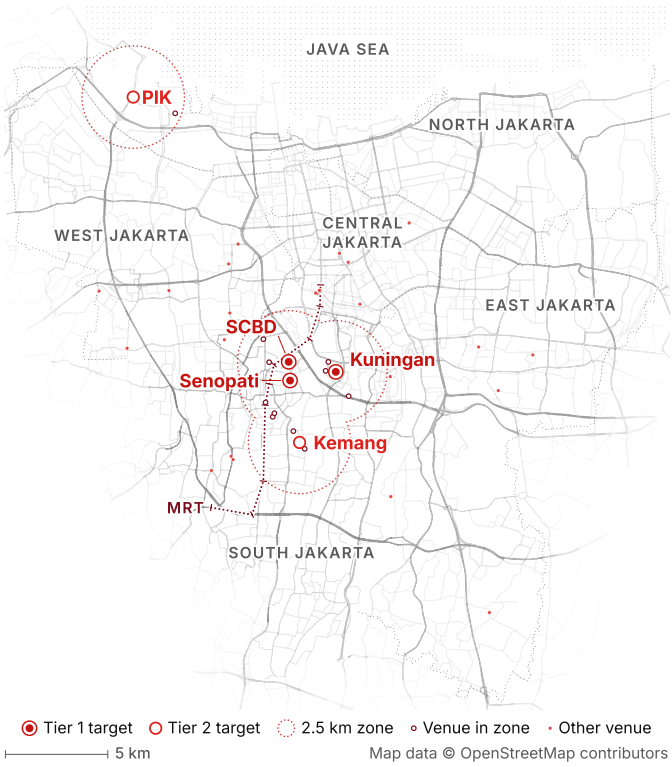

~15,000
expat workers (2024, likely undercounted): too few for volume [7]

837,400
university students in Jakarta [62]

A	Young CBD professionals	PRIMARY TARGET	23
B	Affluent S. Jakarta residents		21
C	Run and padel community		21
E	Expatriates		18
D	University students		17
F	Families and groups		16

Team score out of 30 (six criteria, 1 to 5 each)

Team judgement; criteria and scores from report section 6.

Target districts with 2.5 km zones, Italian and pasta venues (12 of 36 within a zone) and the MRT line [29, 67]

SIX SEGMENTS COMPARED [2, 7, 36, 50, 51, 60, 63]

- A. Young CBD professionals, 25 to 39: weekday lunch and coffee.
- B. Affluent South Jakarta residents: weekends, evenings; small, demanding.
- C. Run and padel community: post-workout bowls and drinks; small.
- D. Students: **48%** of Gen Z spend under **IDR 10,000** per coffee.
- E. Expatriates: high income, too few for volume.
- F. Families and groups: sharing, weekends; test later.

WHERE THEY ARE [29, 67]

- Tier 1: SCBD (Sudirman Central Business District), Senopati, Kuningan.
- Tier 2: Kemang, PIK (Pantai Indah Kapuk).
- 12 of 36 Italian and pasta venues lie within 2.5 km of targets.
- Their average rating is 4.68: CORSA's Zurich 4.9 is not unique locally.

WHAT WOULD CHANGE THE CHOICE

- Under about 1 in 5 CBD workers paying weekly: shift to residents (B).

WHAT IT MEANS FOR CORSA

- **Primary: health-aware young professionals, 25 to 39, around SCBD, Senopati and Kuningan.**
- **Community engine: run and padel clubs reach them cheaply.**
- **Students and expats support trial and image; not 'all Gen Z'.**

HOW TO CONTINUE

a. Field week, if confirmed: count lunchtime foot traffic at Tier 1 sites.

b. Field week, if confirmed: survey 150 to 200 people on weekly price acceptance.

c. Test families (F) later: weekends, PIK, malls.

Note. Team scoring, to be revalidated. Desk-worker range is an estimate.

Price for the local wallet

WHY WE LOOKED Pillar 2 needs price and staff-cost inputs: how does Jakarta's wallet compare with Switzerland's?

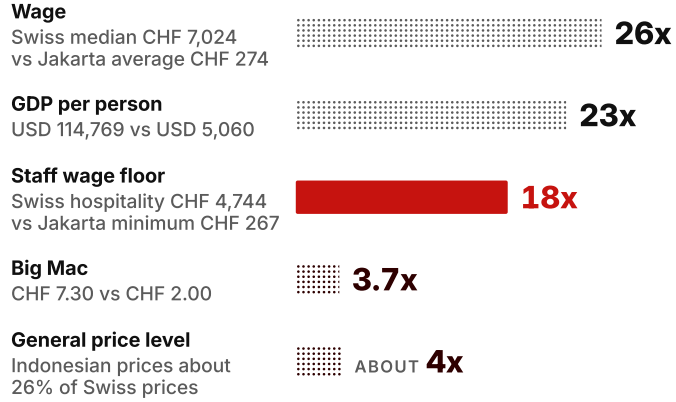

THE DATA Swiss figures (mainly Federal Statistical Office 2024) are shown because CORSA is Zurich-born and the report compares Jakarta with its home market. Jakarta spending, average wage and inequality are Statistics Indonesia data (2025 to 2026); price level (World Bank 2025), Big Mac and inflation are Indonesia-wide.

~26%
Indonesian price level vs Switzerland (World Bank 2025) [15]

18x
lower staff cost: minimum wage CHF 267 vs Swiss hospitality CHF 4,744 [18, 16]

CHF 190
South Jakarta spend per person per month (IDR 4.08M), 38% above the Jakarta average [2]

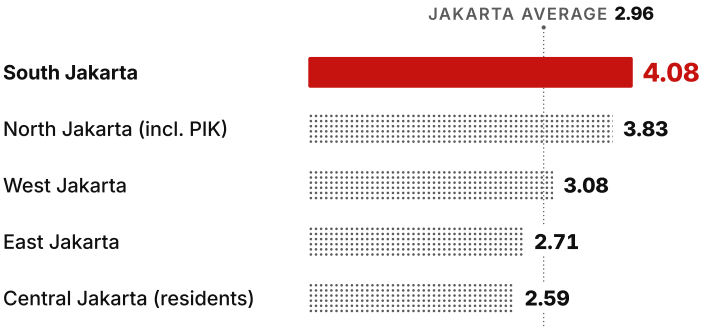

IDR 38,000
average Jakartan's daily spend on all food (CHF 1.77) [2]

How many times higher Switzerland is than Jakarta or Indonesia [14, 15, 16, 17, 18].

SWITZERLAND VS JAKARTA [14, 15, 16, 17, 18]

- Median Swiss wage **CHF 7,024**; Jakarta average wage **IDR 5.9M** (**CHF 274**).
- Jakarta minimum wage 2026: **IDR 5.73M** (**CHF 267**).
- Big Mac: **IDR 43,000** (**CHF 2.00**) vs **CHF 7.30**, cheapest in the index.
- A **CHF 20** Zurich meal feels like **IDR 110,000** locally.

Spending per person per month, IDR million, 2025, by Jakarta city. BPS (Statistics Indonesia) via Databoks [2].

WHERE THE MONEY IS [2, 23]

- South Jakarta **IDR 4.08M** vs Central **IDR 2.59M** per person per month.
- Jakarta average **IDR 2.96M**; South Jakarta is **38%** above it.
- Inequality (Gini index) 0.435, the highest in Indonesia.

COSTS VS PRICES [22]

- Food, drink, tobacco inflation **4.37%** vs restaurant prices **2.70%** (Sep 2026).

WHAT IT MEANS FOR CORSA

- **Price for the local wallet; never convert Swiss prices.**
- **Staff costs about 18x lower: invest the gap in service speed.**
- **Target a micro-catchment, not the average Jakartan.**
- **Costs rise faster than menu prices: review prices yearly.**

HOW TO CONTINUE

a. Finance: model 1 CHF = **IDR 21,500**, with a range of plus or minus **10%**.

b. Location team: rank sites by daytime population and income, South Jakarta first.

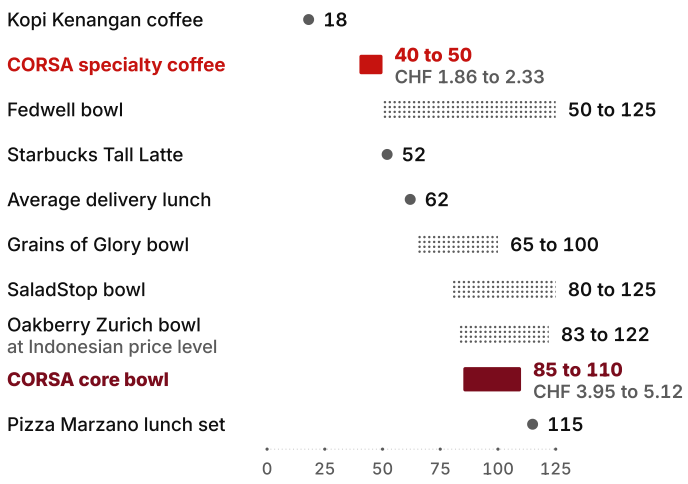

c. Re-check BPS (Statistics Indonesia) figures on the BPS site before the final model.

Note. BPS figures come via Databoks and GoodStats because the BPS site blocked automated access.

Core bowl at IDR 85,000 to 110,000

WHY WE LOOKED Pillar 2 needs a price assumption: where would a CORSA bowl sit on Jakarta's price ladder?

THE DATA Anchors are chain menu prices (2025 to 2026), a 2023 list of Jakarta healthy restaurants and Oakberry Zurich delivery prices scaled to Indonesia's price level. Willingness to pay comes from national surveys (NielsenIQ 2025, Jakpat 2024 to 2025); no CORSA price is tested yet.

IDR thousand per item. Restaurant prices exclude 10% tax and 5 to 10% service; healthy-bowl prices from 2023 menus, probably 10 to 20% higher today.

Sources [10, 15, 37, 38, 48, 49]; CORSA prices: report section 7.

IDR 85,000 to 110,000
proposed CORSA core bowl (CHF 3.95 to 5.12), before tax and service [48, 49, 15]

IDR 40,000 to 50,000
proposed specialty coffee (CHF 1.86 to 2.33) [37, 38]

23%
of Gen Z pay IDR 25,000 (CHF 1.16) or more for a coffee [36]

48% vs 19%
would pay +10% vs +20% for food with health benefits [4]

MODEL INPUTS FOR THE JAKARTA FINANCIAL MODEL [10, 15, 18, 22, 33, 37, 38, 48, 49, 65, 66]

INPUT	STARTING POINT	RANGE TO MODEL	CONFIDENCE
Exchange rate	1 CHF = **IDR 21,500** (8 Oct 2026) [65]	**+/-10%**	**Strong**
Core bowl	**IDR 85,000 to 110,000** [49, 48, 15]	**IDR 75,000 to 125,000**, plus **10%** tax, 5 to **10%** service	Medium
Specialty coffee	**IDR 40,000 to 50,000** [37, 38]	**IDR 35,000 to 55,000**	Medium
Visits per core customer	No Jakarta data	1 to 3 per month to 1 to 3 per week	**Missing**
Delivery fee	About **20%** commission plus promotions, 2021 to 2022, unverified for 2026 [33, 10]	20 to **30%** of delivery sales	**Weak**
Staff wage floor	**IDR 5,729,876 (CHF 267)** per month, **+6.17%** [18]	**+6%** per year	**Strong**
Food cost growth	**4.37%**; volatile food up to **6.21%** [22]	4 to **6%** per year	**Strong**
Seasonality	Ramadan: daytime down, evening and groups up [66]	One month with shifted hours	Medium

WHAT IT MEANS FOR CORSA

- **Price like local healthy bowls; add no extra health premium.**
- **Healthy bowls already cost 1.3 to 2x a delivery lunch: justify with portion, taste, experience.**
- **Coffee at IDR 40,000 to 50,000 is top tier; it needs a quality or functional reason.**
- **Keep an entry-price item for value-seeking customers.**

HOW TO CONTINUE

a. Field week, if confirmed: test three price levels in the intercept survey.

b. Scan delivery-app prices at 15 to 20 venues; visit stores if a trip happens.

c. Model the core bowl at **IDR 75,000 to 125,000** until tested.

Note. Menu prices exclude 10% tax and 5 to 10% service. Healthy-bowl prices are from 2023 lists, probably 10 to 20% higher today.

Taste and price first, health second

WHY WE LOOKED Meeting 4 asked to link behaviour to price, product and marketing.

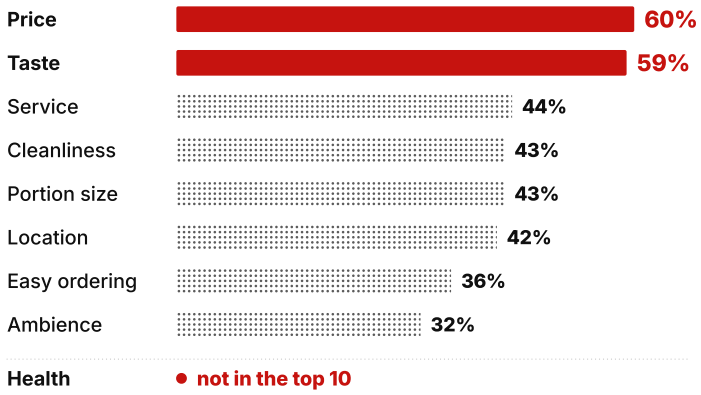

THE DATA Choice drivers: Jakpat survey of 15 to 25 year olds in 8 urban Java cities (2025), a proxy for young urban Indonesians that may leave out Jakarta. Reviews: the team's own dataset, 3,061 Google reviews of 36 Jakarta Italian and pasta venues (Sep 2026).

63%
eat out at least twice a week (age 15 to 25, urban Java) [8]

60% / 59%
choose a place on price / taste; health is not in the top 10 [8]

62%
eat rice every day [9]

65.8M
QRIS users (Indonesia's national QR payment standard) [31]

Share naming each factor when choosing where to eat; age 15 to 25, urban Java, Sep 2025. Jakpat via Databoks [8].

WHEN AND HOW THEY EAT [8, 9, 10]

- Main occasions eaten out: dinner **41%**, lunch **37%**.
- **46%** drink coffee daily; the afternoon is the peak.
- Delivery: **55%** use it for promotions; orders are snacks **49%**, drinks **33%**.

HOW THEY DISCOVER [11]

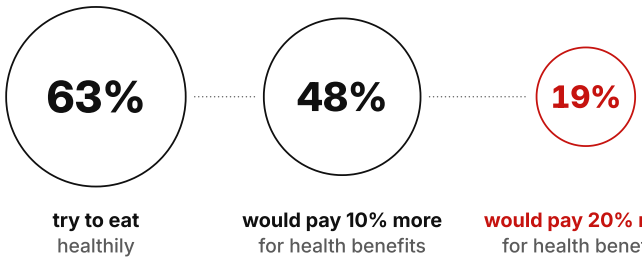

- New places are tried via friends **44%**, TikTok **40%**, opening promos **48%**.

HEALTH IS REAL, NOT HEADLINE [27, 30]

- **63%** try to eat healthily; **74%** in the 'CORSA Core' filter (n=141).
- **48%** of Jakarta adults are overweight or obese.

COMPETITORS' CRITICAL REVIEWS (3,061) [29]

- Flavour is mentioned **2x** more in critical than positive reviews: **22.5%** vs **11.0%**.
- Slow service appears in **27.9%** of critical reviews.

Circle area is proportional to the share. Two different surveys: Statista [27] and NielsenIQ [4].

Indonesian consumers: trying to eat healthily [27]; willing to pay more for food with added health benefits [4].

WHAT IT MEANS FOR CORSA

- **Win on taste, portion and experience.**
- **Health is the reason to feel good, not the headline.**
- **Design for weekday lunch and after-work dinner.**
- **Accept QRIS everywhere; use delivery for discovery and drinks, reward pickup.**

HOW TO CONTINUE

a. Field week, if confirmed: blind taste test, 3 core vs 3 localised recipes.

b. Field week, if confirmed: intercept survey on occasions, price and visit frequency.

c. Set a lunchtime service-speed target.

Note. Jakpat survey [8]: age 15 to 25, urban Java, may exclude Jakarta. Reviews [29] are Google reviews of 36 Jakarta Italian and pasta venues.

Keep the brand, adapt the habits

WHY WE LOOKED The 7 Oct Market Entry Meeting asked to make culture felt: does the brand transfer?

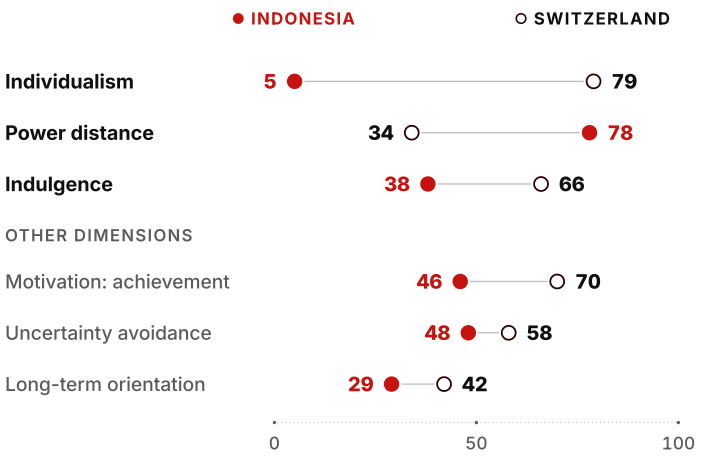

THE DATA Hofstede is used because Paul presented it in Meeting 4; its weakness: scores are national averages, not Jakarta customers, and were revised in 2023 (Indonesia individualism 14 before, 5 now). Muslim share: Jakarta population register 2024; Ramadan spending: national Grab report 2025.

5 vs 79
individualism, Indonesia vs Switzerland (Hofstede cultural dimensions index, 0 to 100) [24]

~87%
Muslim in Jakarta (population register 2024: 87.36%; other sources 84 to 87%) [25]

8 in 10
Indonesians plan to spend more during Ramadan (2025) [66]

78%
of South Jakarta runs are group runs [6]

Hofstede cultural dimensions index, 0 to 100, Indonesia vs Switzerland, revised scores [24].

CULTURAL GAP [24]

- Power distance 78 vs 34: visible status matters.
- Indulgence 38 vs 66: say 'balanced', not 'treat yourself'.

RELIGION AND SEASONS [13, 66]

- Halal mandatory for medium and large firms since Oct 2024.
- Ramadan: daytime demand falls, evening and group demand rise.

NOT YET KNOWN

- No Indonesian data yet on subscription or loyalty interest: test it.

KEEP VS ADAPT

- Keep: racing and Italian identity, specialty coffee, Mediterranean health promise, premium design, community.
- Adapt: halal supply (cheese, stocks, no wine), spice, rice or grain option.
- Adapt: Ramadan hours, group formats.

TURN COLLECTIVISM INTO A CHANCE [1, 6, 11, 63, 66]

- Partner with run and padel clubs: **78%** of South Jakarta runs are group runs.
- Sell 'model for two' and group bundles.
- Make store and products shareable: friends **44%**, TikTok **40%** drive trial.
- Launch with creators and community events: early acquisition cost is high.
- Offer family and Ramadan group dinners: households about 3.7 people (North Jakarta).

WHAT IT MEANS FOR CORSA

- **Keep the brand; localise supply chain, spice and staples.**
- **Halal from day one; group formats may lower acquisition cost.**

HOW TO CONTINUE

a. Field week or partner, if confirmed: two run-club or padel events, tracked codes.
b. Add a survey question on subscription types and meal packs.
c. Budget halal certification and sourcing now.

Note. Revised Hofstede scores (older sources: Indonesia individualism 14). Household size: North Jakarta figure; no province-wide figure published.

Cashless, fit and back in the office

WHY WE LOOKED Pillar 2 needs growth and risk inputs: which trends change who buys, how often, or at what margin?

THE DATA Running, padel, metro and office-occupancy figures are Jakarta data (2024 to 2026). Cashless-payment and middle-class figures are national series (Bank Indonesia, Statistics Indonesia) with no Jakarta breakdown found; office days, TikTok reach and delivery are national too. They show direction, not Jakarta's level.

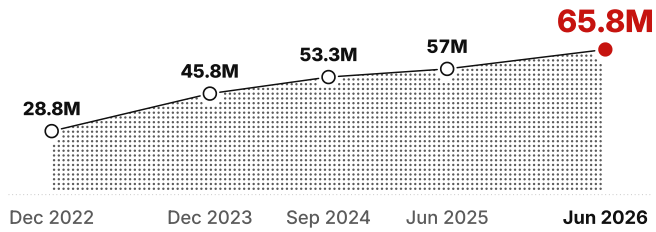

65.8M
QRIS (Indonesia's national QR payment standard) users, Jun 2026 [31]

-10.6M
Indonesian middle class since 2019 [5]

87%
of Indonesian employees work fixed office days [57]

180M
Indonesian adults reached by TikTok ads [54]

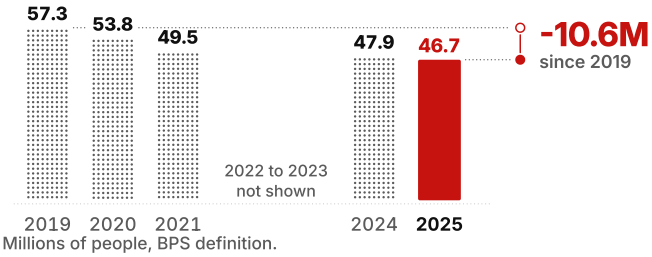

TAILWINDS

QRIS users in millions; spacing follows real time between checkpoints.

QRIS users, Bank Indonesia checkpoints [31].

HEADWINDS

Millions of people, BPS definition.

Indonesian middle class, BPS (Statistics Indonesia) via Kontan [5].

MORE TAILWINDS [31, 50, 51, 52, 53, 58, 59]

- Commuting: MRT (Jakarta metro) riders **40.8M** (2024) to **46.5M** (2025).
- CBD (central business district) office occupancy **76.3%**.
- Health labels: Nutri-Level grades A to D decreed Apr 2026.
- Sugary-drink excise excludes in-store drinks.

MORE HEADWINDS [5, 10, 32, 55, 56]

- Middle-class job share fell from **14%** to **8%**.
- Delivery is **USD 6.4bn**, but **55%** use it for promotions.
- Consumer confidence still positive: 118.5.

78%
- of South Jakarta runs are group runs (2024)

31,000
- marathon runners in 2025, double the 2024 number

326
- padel courts in Jakarta, of 947 in Indonesia

Sources [6, 50, 51].

WHAT IT MEANS FOR CORSA

- **Build a reliable weekday lunch near MRT stations and offices.**
- **Low-sugar grade A or B drinks can beat sweet local coffee.**
- **Model a conservative visit frequency; the middle class is shrinking.**
- **Launch with creators and run-club events; viral demand fades fast.**

HOW TO CONTINUE

a. Shortlist Tier 1 sites near MRT stations and occupied office towers.

b. Design drinks to earn Nutri-Level grade A or B before launch.

c. Model base, conservative and optimistic visit-frequency scenarios.

Note. A quarter of CBD office space is empty. Nutri-Level timing for large businesses is still unclear.

Oakberry: simple model, unproven in Jakarta

WHY WE LOOKED Oakberry is the mandatory benchmark; Meeting 4 claims needed tracing.

THE DATA US and Canadian data appear because most earlier claims (preliminary analysis and Meeting 4) came from such studies; we traced each one to show direction, not Jakarta evidence, which is still pending. Oakberry facts come from its own pages, Uber Eats Zurich and media, 2023 to 2026.

~1,000
Oakberry stores by May 2026; founded 2016 [46]

4
Indonesian stores, all in Bali (since Nov 2023) [46, 47]

CHF 14.90 to 21.90
Oakberry Zurich bowls (delivery app) [48]

IDR 1.5 to 2.5bn
per Indonesian franchise shop (CHF 70,000 to 116,000); payback 24 to 36 months [47]

EARLIER CLAIMS CHECKED [35, 40, 41, 42, 43, 44, 45]

Convenience is the No. 1 reason (72%) **Use:** Speed and value matter, even for premium	○ TRUE, US 2020
Taste and freshness: 41% of conversations **Use:** Taste beats health, as in Jakarta	○ TRUE, US DATA
Young people prefer small meals (71%) **Use:** Supports small bowls and functional snacks	● TRUE, INCL. INDONESIA
Oakberry loyalty: +50% retention, +25% spend **Use:** Shows an app's potential, not proof for Jakarta	○ TRUE, VENDOR CLAIM
56% cite healthfulness (Meeting 4) **Use:** Health ranks after taste and price, as in Jakarta	○ TRUE, US/CANADA

Most claims are true, but mostly US data: a direction, not Jakarta evidence.

Red dot = includes Indonesian data; grey ring = US, US and Canada, or vendor data. Report section 4.

VERDICT

5 of 5
checked claims hold up

1 of 5
includes Indonesian data; the rest is US, US and Canada, or a vendor claim

2
Meeting 4 claims could not be traced and are not used

Direction, not Jakarta evidence.

WHAT OAKBERRY DOES [15, 47, 48]

- Two core products, three sizes, unlimited toppings for one price.
- Jakarta and Surabaya 'planned'; none in Singapore, Malaysia or Hong Kong.
- CORSA's 120 to 180 sqm flagship is much larger than a kiosk.

NOT TRACEABLE, NOT USED

- '**80%** of Oakberry customers like customisation': no source found.
- '**78%** Gen Z / **67%** millennials like meal subscriptions': not found.

WHAT IT MEANS FOR CORSA

- **Keep the menu short; let customers choose within a fixed price.**
- **Western success is not proof of Jakarta demand.**
- **Oakberry may arrive in Jakarta: a future competitor.**
- **Most claims hold, but US data is direction, not Jakarta evidence.**

HOW TO CONTINUE

a. Visit Oakberry Zurich: in-store prices, topping model.

b. Get Oakberry Bali base bowl prices from GoFood or GrabFood.

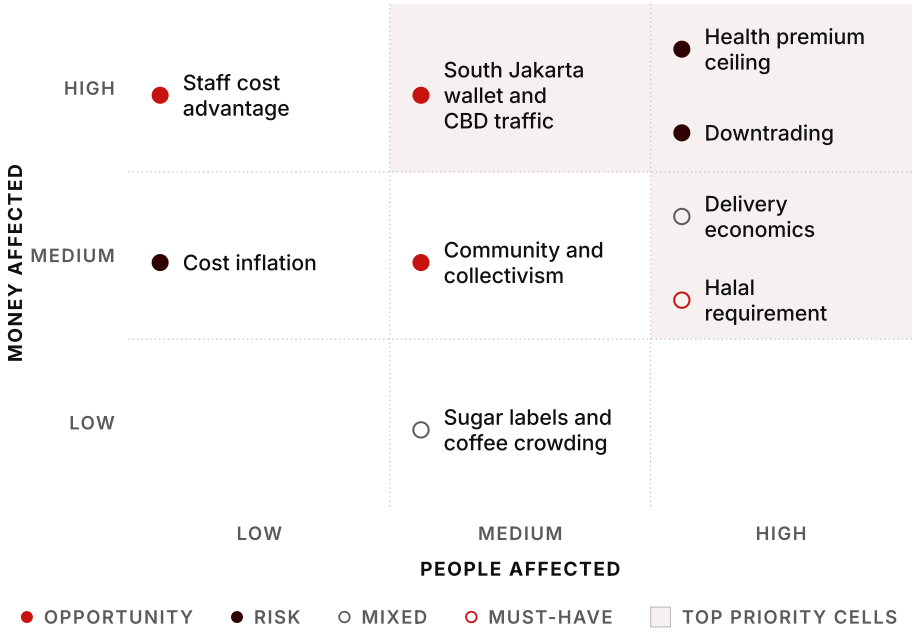

c. Replace US claims with Jakarta survey results.

Note. Zurich prices are delivery-app prices; in-store may be lower.

Price and frequency drive the money

WHY WE LOOKED Meeting 4 asked to rank findings by two indicators: money affected and people affected.

THE DATA Ratings use Samuel's two indicators from Meeting 4, money and people affected, applied by the team to the evidence on pages 2 to 7. They are judgement, not model output; re-score once the Pillar 2 model has numbers.

Money = cash flow and profit; people = reach and engagement. Report section 7, team assessment.

19%
would pay 20% more for health [4]

CHF 267
Jakarta minimum wage vs CHF 4,744 Swiss hospitality [18, 16]

~20%
delivery commission (2021 to 2022 data) [33]

+4.4% / +2.7%
food cost vs menu price inflation [22]

NINE FINDINGS, RANKED [1, 2, 4, 6, 10, 12, 13, 16, 18, 22, 24, 25, 29, 32, 33, 39, 49, 52, 61]

FINDING	TYPE	MONEY	PEOPLE	WHO USES IT
Health premium ceiling	**Risk**	**High**	**High**	Finance: price, ticket
Downtrading	**Risk**	**High**	**High**	Finance: scenarios
Staff cost advantage	**Opportunity**	**High**	Low	Finance: staff plan
South Jakarta wallet, CBD traffic	**Opportunity**	**High**	Medium	Location team
Delivery economics	Mixed	Medium	**High**	Finance; operations
Community and collectivism	**Opportunity**	Medium	Medium	Marketing; benchmarking
Halal requirement	**Must-have**	Medium	**High**	Operations; legal
Cost inflation	**Risk**	Medium	Low	Finance: costs
Sugar labels, coffee crowding	Mixed	Low	Medium	Product

WHAT IT MEANS FOR CORSA

- **The biggest money questions are price and visit frequency.**
- **Neither is known yet; both can be tested before signing a lease.**
- **Use the staff cost advantage to invest in service speed.**

HOW TO CONTINUE

a. Finance: build base, conservative and optimistic scenarios on this ranking.

b. Location team: rank sites by daytime population and income.

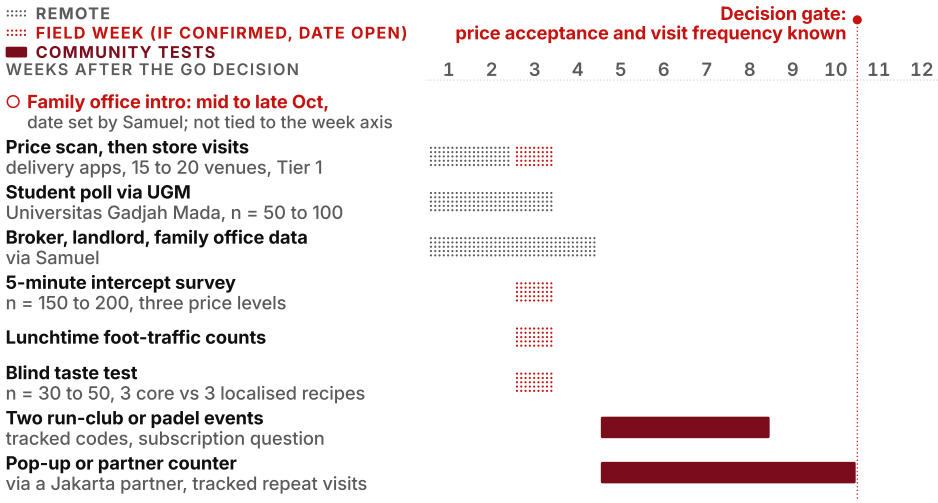

c. Operations and Marketing: plan halal sourcing and community formats now.

Note. Money = cash flow and profit; people = reach and engagement. Ratings are the team's assessment.

Seven tests before signing a lease

WHY WE LOOKED Meeting 4 asked to link the research to the joint 90-day roadmap and the financial model.

THE DATA The plan rests on the report's known-versus-missing review and meeting inputs: student poll (Meeting 4), family office timing (Meeting 5). Confidence levels are team judgement; weeks count from the go decision, not calendar dates.

Indicative timing in weeks after the go decision. The Jakarta field week is not confirmed and has no date yet.

Seven low-cost actions from report section 8; family office introduction mid to late October [1]; field week not confirmed, date open.

7
low-cost research actions in 90 days

150 to 200
intercept interviews in Tier 1 districts, if a field week is confirmed

30 to 50
blind taste testers, if a field week is confirmed

Mid to late Oct
family office introduction, once the team's work is ready (Samuel, Meeting 5) [1]

SEVEN RESEARCH ACTIONS	RESEARCH ACTION AND SAMPLE [1, 29]
Can they afford CORSA? CONFIDENCE **Strong**	FIELD WEEK, IF CONFIRMED 5-minute intercept survey, n = 150 to 200, SCBD, Senopati, Kuningan; three price levels
How often will they come? CONFIDENCE **Medium**	FIELD WEEK, IF CONFIRMED Same survey. Later, via a Jakarta partner: pop-up or counter tracking repeat visits
Will they like pasta bowls? CONFIDENCE **Medium**	FIELD WEEK, IF CONFIRMED Blind taste test, 3 core vs 3 localised recipes, 30 to 50 people
How many customers per site? CONFIDENCE **Medium**	REMOTE Broker, landlord and family office data (via Samuel). FIELD WEEK, IF CONFIRMED Lunchtime foot-traffic counts
What do competitors charge? CONFIDENCE **Medium**	REMOTE, START NOW Delivery-app price scan of 15 to 20 venues. FIELD WEEK, IF CONFIRMED Store visits
Do community and subscription formats work? CONFIDENCE **Weak**	COMMUNITY TESTS On site or via clubs: two run-club or padel events with tracked codes; survey question on subscription types
What do young Jakartans think? CONFIDENCE **Medium**	REMOTE, START NOW Poll of 50 to 100 students via HSG partner Universitas Gadjah Mada (UGM), with Samuel's approval

DECISION GATE

Measure price acceptance and visit frequency before signing a lease.

Results feed base, conservative and optimistic business-case scenarios.

[1]

NOT YET DECIDED

- Whether a Jakarta field week happens at all.
- When it would take place: the date is open.

WHAT IT MEANS FOR CORSA

- **The environment is well documented; CORSA's own customers have not been asked yet.**
- **Seven low-cost actions would replace the biggest model assumptions with real numbers.**
- **Remote actions start now; a confirmed field week would add survey and taste tests.**

HOW TO CONTINUE

a. Remote only for now: student poll, price scan, desk work; decide the trip later.

b. Remote plus a field week, if confirmed: survey, price and taste tests together.

c. Remote plus a Jakarta pop-up or partner counter tracking repeat visits.

Note. Field week: not confirmed, date open; remote actions start regardless. Family office introduction: planned for mid to late October, once the team's work is ready (Samuel, Meeting 5).

Promising niche, unproven demand: test first

WHY WE LOOKED For the reader who reads only one page: findings, relevance, limits and next steps.

IDR 4.08M
South Jakarta spend per person per month (CHF 190), the highest in Indonesia [2]

60% / 59%
choose a place on price / taste (age 15 to 25, urban Java) [8]

Only 19%
of Indonesians would pay 20% more for food with added health benefits [4]

IDR 85,000 to 110,000
proposed core bowl (CHF 3.95 to 5.12) before tax and service, in line with local healthy bowls [48, 49, 15]

WHAT THE REPORT TELLS US [2, 4, 6, 8, 13, 15, 48, 49]

- Core buyer: health-aware young professionals, 25 to 39, around South Jakarta's Tier 1 districts.
- Spending power is concentrated: South Jakarta is **38%** above the Jakarta average.
- Young urban Indonesians choose on price and taste; health earns little premium.
- Price like local healthy bowls, **IDR 85,000 to 110,000**; never convert Swiss prices.
- Keep the brand; localise halal, spice and staples; recruit via run and padel clubs.

WHY IT MATTERS FOR CORSA [1, 15, 16, 18, 48, 49]

- Pillar 1 (strategic fit): CORSA fits a narrow, wealthy niche, not all of Jakarta.
- Pillar 2: bowl **IDR 85,000 to 110,000**; staff cost about **18x** lower; visits unknown.
- Family office call: these facts let the team discuss sites and partners as equals.

LIMITATIONS [8, 24, 41, 43, 44, 45, 49]

- Desk research only: no CORSA customer in Jakarta has been asked yet.
- National or urban-Java data stand in where Jakarta data is missing.
- US, Canadian and vendor data show direction only, not Jakarta evidence.
- Segment scores and rankings are team judgement; healthy-bowl prices are 2023 lists.
- Hofstede culture scores (0 to 100) were revised: Indonesia individualism 14 before, 5 now.

WHAT TO DO NEXT [1]

- Decision gate: measure price acceptance and visit frequency before signing a lease.
- Start remote actions now: UGM (Universitas Gadjah Mada) poll, delivery-app price scan, desk work.
- Decide whether a Jakarta field week happens, and when; the date is open.
- Feed results into base, conservative and optimistic scenarios of the financial model.

FOR THE NEXT TEAM MEETING [1]

1. Field week: confirm or drop it; if confirmed, set the date.
2. 90-day plan: which option on page 10 (a, b or c) Samuel prefers.
3. Family office introduction (mid to late October): what the team must have ready.
4. Price test: agree the three price levels the intercept survey will show.
5. Finish the PESTEL (outside forces) and CAGE (country distance) analysis: see below.

FINISH PESTEL AND CAGE: WHY AND HOW [1]

WHY the report covers only PESTEL Social and Economic, CAGE Cultural and Economic.

WHY the six missing dimensions likely hold licence, import and site risks (team view).

WHY in Meeting 5, Samuel said the frameworks combine what the team discussed.

HOW split with Paul; PESTEL first, check-up, then CAGE for what it means.

HOW Drive folder per CAGE dimension; check who published each number; rank by importance.

WHAT IT MEANS FOR CORSA

- **CORSA can work in Jakarta, but only in a narrow, wealthy micro-catchment.**
- **Price and visit frequency decide the business case; test both before a lease.**

HOW TO CONTINUE

a. Approve the decision gate: price and visit frequency measured before any lease.

b. Approve the remote actions: student poll, price scan and desk work start now.

c. Decide whether a Jakarta field week happens; if yes, set the date.

Note. Desk research only; the tests on page 10 may change these conclusions.

Where the numbers come from

WHY WE LOOKED Samuel asked in Meeting 4 to verify every source; numbering matches the full report.

LINKS Numbers in brackets throughout the brief jump to this list; underlined addresses open the web page.
