# Recap

## Overview

This kickoff brought Samuel and his co-founder Joshua together with six students for the Corsa project. Samuel drove most of the session: introductions, working norms, the personality profiles, the Corsa story and his strategy and execution framework. He argued Jakarta is a strong fit, mainly because of his network, but said the students must validate it themselves. Tiago presented early market research and proposed a personalized drink app. Paul raised the Philippines as an alternative, and the scope includes testing other locations with evidence.

The group split into Pair A (market entry) and Pair B (finance, Paul and Marius). The business draft presentation of 12 to 15 minutes is on 22 October. Joshua proposed a review on 9 October, but Samuel prefers the proposal by the end of September. A draft goes to Samuel on 29 September at lunch, and the final proposal is due on 30 September by 6 p.m. The final presentation is on 11 December, with 18 December possible. Samuel may travel to Jakarta in early November, with exact dates open. The next meeting is Thursday 1 October 2026 at 5 p.m. in Zurich, and Samuel's side will send the location.

## Key points

- The proposal draft goes to Samuel on 29 September at lunch and the final proposal is due on 30 September by 6 p.m., with a limit of 6 pages that 7 pages or an additional paper may exceed. (1:23:47, 1:24:29)
- Pair A works until 22 October on market entry and a business and finance case, ending in a 12 to 15 minute business draft presentation; the 9 October mid-point review was only a proposal. (47:39, 48:36)
- Samuel's framework is strategy plus execution, and he sees execution as depending on teamship and partnership. (30:55, 31:35)
- The Zurich pit stop ran for 3 months, reached over 200,000 people and saw over 50,000 passers-by a day, based on calculations using SVB data. (37:20)
- Asian visitors, including 2 couples arriving with luggage from the airport, led to the idea of bringing Corsa to Asia, not yet specifically Jakarta. (38:07, 38:53, 39:08)
- Samuel chose Jakarta for his personal network and its size (over 40 million people, bigger than Tokyo), while the Philippines was raised by Paul and the scope lets the team challenge Jakarta with evidence. (1:18:52, 1:17:29, 1:18:34)

- Tiago's research found that pizza revenue in Indonesia is almost equal to European food, top brands are mostly European fast food, and consumers care about healthy food and avoiding plastic. (1:19:54, 1:20:38)
- The project has a consultant phase followed by a visionary phase on food tech, food logistics and physical AI, and these 3 topics cannot be changed. (1:00:03, 1:00:58, 1:09:11)

# Ideas discussed

## Personalized shareable drink app

Tiago proposed an app where users build and share their own drinks, with AI suggestions by mood. Samuel liked it, added a profile aspect and said to keep it open. (1:03:45, 1:04:29, 1:05:05)

## Optional Indonesia trip

Samuel offered students the chance to join him in Jakarta in November for interviews and networking at their own cost. Dates are open and Tiago and Jonas have an exam on 13 November. (1:05:45, 1:07:15, 1:10:30)

## Consultants then visionaries

Joshua proposed a second phase where students think as entrepreneurs about food tech, customer behavior and robotics. It was adopted as the project structure. (1:00:03, 1:00:58)

## Jumper between both pairs

Tiago argued for people linking both pairs, and Samuel suggested Tiago could jump between groups. Matthieu offered to be the jumper, while Samuel was skeptical of uneven splits. (52:56, 54:04, 54:28)

## WhatsApp community structure

Tiago proposed a WhatsApp community with a group A, a group B and a general chat. Samuel said they can try it and see. (1:29:36, 1:30:01)

# Decisions

1. Paul and Marius form Pair B on finance, and the rest of the group forms Pair A. (57:28, 57:49)
2. The group will use a group chat for communication, and students tag Sam when they need something. (59:10)
3. The 3 topics to follow (food tech, food logistics, physical AI) cannot be changed. (1:09:11)

4. If students cannot form the groups themselves, everyone works on the project together as one group. (1:09:11)
5. The next meeting is Thursday 1 October 2026 at 5 p.m. in Zurich, and Samuel's side will send the location. (1:28:22, 1:29:09)
6. The proposal draft goes to Samuel's side on the 29th at lunch for feedback, and the final proposal is due on the 30th by 6 p.m. (1:23:47, 1:28:22)
7. The business draft is presented in a 12 to 15 minute presentation on the 22nd of October. (47:39)

## Next actions

| OWNER | TASK | DUE |
|---|---|---|
| Samuel | Send the meeting summary to the group and set up a drive with folders (17:27) | No date |
| Samuel | Present the Corsair framework to the group (30:14) | after this meeting |
| Unassigned | Watch one Formula One race to get the feeling of the concept (35:54) | within the next 3 months |
| Unassigned | Validate the strategic fit of Jakarta themselves (44:08) | No date |
| Unassigned | Send the prepared proposal and handout to the students (49:16, 51:01) | No date |
| Unassigned | Prepare the business draft presentation of 12 to 15 minutes (47:39) | 22nd of October |
| Unassigned | Finalize the proposal, add own vision and structure the strategic fit and financial fit (49:49) | end of September |
| Unassigned | Use the group chat and tag Sam when a network contact or help is needed (59:10) | No date |
| Unassigned | Hold a quick follow-up meeting and split into 3 teams (1:05:05) | before the 12th of November, or shortly in October |
| Unassigned | Write down Tiago's personalized drink app idea and keep it open (1:05:05) | No date |
| Samuel | Prepare a small board of what is needed from the Jakarta trip and the family, and come back to the students (1:11:15) | No date |
| Samuel | Send the 17 page scope proposal to the students (1:15:23, 1:16:17) | No date |

| OWNER | TASK | DUE |
|---|---|---|
| Unassigned | Shorten the scope proposal to about 6 pages and send questions about unclear points (1:16:17) | No date |
| Unassigned | Challenge the Jakarta choice with evidence if another location looks better (1:18:34, 1:18:52) | No date |
| Unassigned | Send a draft of the proposal to Samuel for feedback (1:23:47) | 29th at lunch |
| Unassigned | Submit the final proposal (1:23:47) | 30th by 6 p.m. |
| Paul | Add Samuel to the group chat and make him an admin (1:29:09) | No date |
| Samuel | Send the meeting location for Thursday 1 October (1:29:09) | 1 October |
| Unassigned | Send names to Samuel, since numbers were not saved (1:29:24) | No date |

# Open questions

- Is the 9th of October mid-point review needed, or should the proposal be done by the end of September?
  Raised by Samuel (48:36, 49:49)
- Will the final presentation be on the 11th or the 18th of December?
  Raised by Samuel (1:07:56, 1:08:32)
- What are the exact dates of the Indonesia trip, given only the first 2 weeks of November after the 28th of October wedding are known?
  Raised by Samuel (1:07:15)
- How can the Jakarta trip work with the exam of Tiago and Jonas on the 13th of November?
  Raised by Tiago (1:10:30, 1:11:15)
- Was Jakarta the first option for expansion, or were other options ruled out first?
  Raised by Tiago (44:54)
- Who is the customer and who is being targeted?
  Raised by Tiago (1:22:41)

# Per person

## Samuel

Samuel led the kickoff as co-founder of Corsa's company, presenting the concept, the Jakarta project scope, deadlines and his network.

POINTS MADE

- Strategy plus execution is his framework, and execution needs teamship and partnership, meaning mutual respect, direct talk, feedback and a happy mood.
- Jakarta is a strong strategic fit because of his personal network, though the students must validate it themselves.
- He wants the proposal ready by the end of September, with a draft on the 29th at lunch and the final due on the 30th.

TASKS

- Send the meeting summary to the group and set up a drive with folders
- Present the Corsair framework to the group
- Prepare a small board of what is needed from the Jakarta trip and the family, and come back to the students
- Send the 17 page scope proposal to the students
- Send the meeting location for Thursday 1 October

## Tiago

Tiago contributed market research, a personalized drink app idea and arguments for people linking both pairs.

POINTS MADE

- He argued that people working in both groups are critical for linking them, and he prefers Pair A.
- He proposed an app where users create and share personalized drinks, with an AI suggesting drinks by mood.
- His research found that pizza revenue in Indonesia is almost the same as European food, and consumers care about healthy food.

## Joshua

Joshua is Samuel's co-founder who explained the Pair A scope, the deadlines and the two-phase structure.

POINTS MADE

- Pair A works on market entry until the 22nd of October, and he proposed the 9th of October as a mid-point review.
- He described two phases: students first act as consultants, then as visionaries thinking about future innovation.
- He said they still use the Micro Elo until 18th of October and have a second one.

## Paul

Paul introduced his finance and aviation charter background and was placed in Pair B with Marius.

POINTS MADE

- He has chartered flights and done cost calculation, and he has already been to Southeast Asia.
- He asked why not the Philippines, since Filipinos love Western and European fast food.
- He said the date Matthieu raised for the project work was wrong.

TASKS

- Add Samuel to the group chat and make him an admin

## Jonas

Jonas shared his startup background, offered to take Pair B and clarified the presentation format.

POINTS MADE

- He works with startups daily through Start Global and wants work experience.
- He is willing to take Pair B and has done financial forecasting for restaurants, though he is stronger in P&L.
- The presentation format is now completely free, and the video is no longer required.

## Matthieu

Matthieu introduced himself and said he prefers Pair A while staying flexible.

POINTS MADE

- He is in his fifth semester in Switzerland and likes moving, which is why he likes this project.
- He liked the Japan expansion idea.
- He would see himself in Pair A but stays flexible and offered to jump between groups.

## Marius

Marius introduced his banking background and was placed in Pair B with Paul.

POINTS MADE

- He works at the Liechtenstein Gold Trust in banking and is back in Sankalan from 1 October.
- He has spent a lot of time in PowerPoint at work.

### Ana

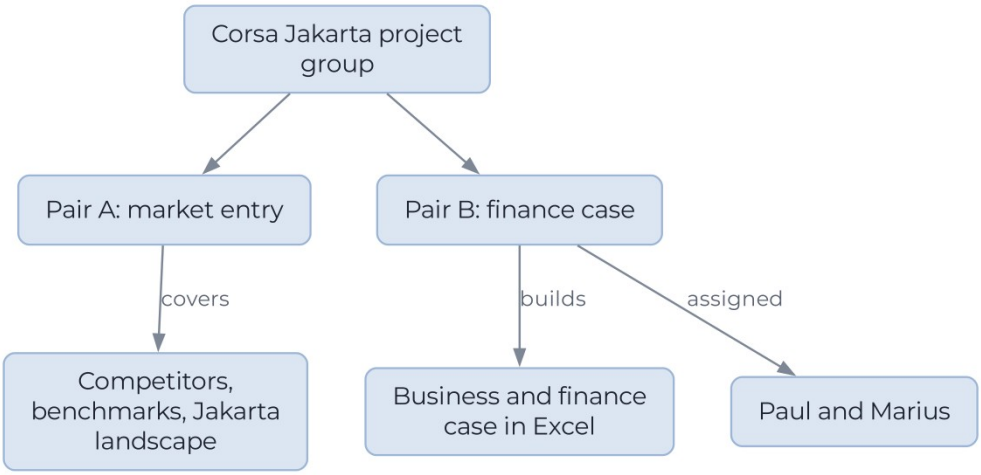

Ana introduced herself as a low dominance exchange student and said she prefers Pair A.

POINTS MADE

- She is a low dominance person who likes open spaces to share ideas and listen to other points of view.
- She felt part of the presentation, like part of the customer and the idea.
- She would also prefer Pair A.

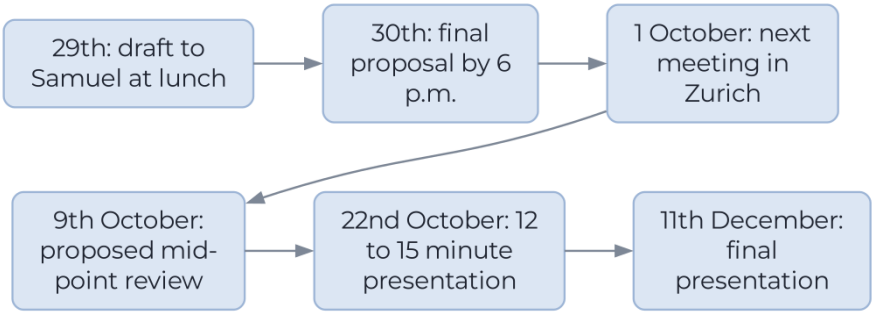

## Diagrams

### Project work structure

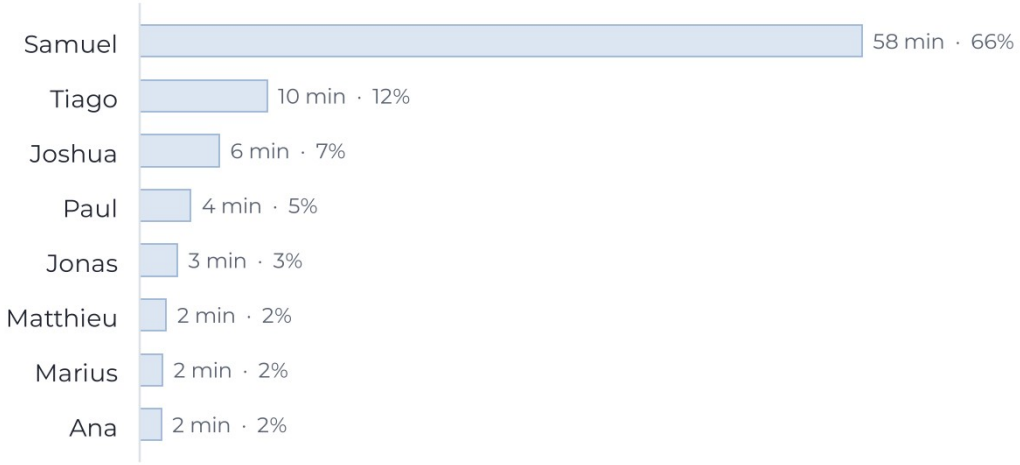

Shows how the group is split into pairs and phases for the Corsa Jakarta project.

### Proposal and next steps

Shows the dated steps from the proposal draft to the final presentation.

## Speaking time

Share of speaking time per person.

## Points to double-check

From an automatic check (claude-haiku-4-5). Some may be false alarms.

OVERVIEW Overview
Samuel's preference for end of September conflicts with Joshua's proposed 9 October review date, not fully resolved.

KEY POINTS The proposal draft goes to Samuel on 29 September at lunch and the final proposal is due on 30 September by 6 p.m., with a limit of 6 pages that 7 pages or an additional paper may exceed.
The draft proposal is due 29 September at lunch with final by 30 September, but the page limit statement about 6 pages or 7 pages or additional paper is imprecise.

IDEAS DISCUSSED Optional Indonesia trip
Item states students' own cost for Jakarta trip, but transcript shows Samuel may travel and invites students to join at their cost, with no confirmation of actual trip occurrence.

NEXT ACTIONS Present the Corsair framework to the group
Action says Samuel will present the Corsair framework after meeting, but transcript indicates it will be sent as a presentation file later, not presented live.

NEXT ACTIONS Hold a quick follow-up meeting and split into 3 teams
Deadline states before 12 November or shortly in October, which is ambiguous; transcript says either before 12 November or 8 days later or beginning of starting week.

OPEN QUESTIONS Will the final presentation be on the 11th or the 18th of December?
Item says final presentation is either 11th or 18th December, but transcript shows 11th December is preferred and 18th is a flexible option only if needed.

PER PERSON Jonas: The presentation format is now completely free, and the video is no longer required.
Jonas said presentation format is now completely free and video no longer required, but transcript shows it was previously optional and is now completely free as a change.

# Transcript

00:00 Samuel Back in the days to drink coffee. And this is, I think, where coffee culture was maybe born. But of course, today we make it a bit more modern, and we make it a bit more cool, and we make it a bit more nice, and the goal is to create fuel for people who want to move. This is opportunity. To also give you an idea of who we are, we will introduce ourselves quickly, and then I would of course love to hear who you are. So I became an entrepreneur like 4 to 5 years ago. I was in real estate a long time.

00:43 Samuel I would say 6, 7 years, and I wanted to be a lawyer. I was also thinking about going to high school one day maybe and, yeah, do the academic way, but quickly I had to understand that maybe I was not made for it or I didn't have enough patience to follow this path. So I chose to work in a startup in the end and to realize what can I use out of that startup, what can I do better? And there was a moment where I realized I think I can do it myself.

01:21 Samuel I started to be an entrepreneur with, I don't know, like 10k on the side and started to make pictures and create a creative agency. Today we are around 10 in the core team, 10 people, and we work together with around 200 different freelancers along the way. I would say 6 years ago Joshua became a really good friend of mine, so we were really good friends and quickly we realized we share almost the same interests.

01:54 Samuel I mean, usually in a boys group you talk about soccer or maybe cars and stuff, and we were always talking about business ideas, and he was helping me a lot growing, running my first company and bringing the other companies along the way. Today we work together, and we have nice to meet you. Hi, nice to meet you. Yeah, sorry. Samuel. All good. Nice to meet you. Hi. So, yeah, today we work together. I would say it's one of the best things in the world to have a co-founder and co-partner in a business, and, yeah, to be on eye level. I am more the guy that is creative when I drink coffee.

02:40 Samuel Joshua is the guy who turns coffee into cash flows. So I think it's a good mix that we have today, and, yeah, maybe with you guys we can create a much bigger coffee culture. So, Joshua, floor is yours.

02:56 Joshua Yeah, thank you, Samuel, for this really kind introduction. Yes, my name is Joshua. Yes, I grew up also in Zurich. I have the benefits of going here to school and whatever. Since 10 years, I've worked with banking. I work with banking activity for different banks, and while I'm having all this experience with a lot of businesses, I found out that banking is really nice, but I want to do more. There was Samuel.

03:32 Joshua We always had great conversations about business and even more about visions, not only our business, but our visions, and now we're here and we did a course a couple of months ago in hv, and yes, I'm more like, let's say, a structured guy, and he's like, he has some crazy ideas sometimes, and sometimes I need to stop him, like, hey, where is the cash going? We need some cash. And yes, that's how we work together, yes. And I hope

04:13 Samuel Great time here. Absolutely. And I think that's a really important point, is to understand each other. I mean, we all do have strengths, and we have the opposite as well in us. And what I learned, and I don't want to give lessons or anything at all, I always will tell you something in between, and you can take it on or not. But what we've learned is

that the more we talk, the more we just tell what we think or what we feel, the better we will be. I mean, you told me that we are maybe only 5 people today. Great, he can join by laptop.

04:56 Samuel You are 10 minutes late, but we were informed. You talk to me, great. This is how we actually want to work. It's not a problem if someone is late. I mean, we all do have a life and cars and traffic or whatever. I don't care. But we have to find solutions always. We want to find solutions, and we want to respect each other, even though if someone has a stupid question or maybe doesn't understand the case, and we are like, what are we, 8 people? So, yeah, maybe 7 will understand it and 1 will not, so we will explain it to this person until the very end. And yeah, please. I've seen your LinkedIn profiles.

05:43 Samuel One was working in Australia in a burger spot. I am, have you been doing, like

05:50 Matthieu this part? It was a Mexican restaurant, so it was not burgers or Mexico Mexican top puritos. No, I was

05:59 Samuel I was, I saw the pretty petty thing in the... Ah yeah, that's just because I like the very...

06:04 Matthieu Nice, so you're from Geneva. I'm from Valen Ballet So let's start with you. So my name is Matthieu. Yeah. And I don't know what you want to know about me, but I'm here in my fifth semester in Switzerland, and I wouldn't say I'm as corporate as I should be to be in single but I enjoy this place, and in my life I like moving, and that's maybe why I like this project more than the others, because, yeah, I need to run and I need to do things in my life. That was it. I just explode.

06:48 Matthieu And yeah, so this case was really interesting for me, and I like the Shaper absolutely, which is like, I'm, I would say, when I read the description of the Shaper, I was like, yeah, okay, that could be me, and I'm a bit more chill. And I don't want to stress people to do something, but I like nothing.

07:14 Samuel Nice to hear. Nice to hear. Also, when we start here a little bit, why I love these diagrams is because it's really easy to understand, and of course it was only 24 questions or 22, I'm not sure, 24, 22. And you cannot make the, like, the whole personality thing, but there's something that is really nice to understand. So we have those 4 indicators, and most of the time, Matthieu is mostly related to my personality as well. Most of the time, you have some that are actually stronger than the others.

07:50 Samuel I don't know if you guys were prepared or if you took too long for doing the test, but the more time you take, the more you really realize what you're looking for. So it's really interesting, I can tell everyone has really similar results, but in the end we got different profiles.

08:10 Samuel So, for example, Matthieu, maybe he's a little bit more on the, I would say, as you mentioned, like a little bit more calm side, chill side, open. He likes harmony, you like, you do work with emotions, in my opinion, and you let yourself also lead into certain situations, and then you decide to be dominant in this situation or to be like, this is more like the corporate side. But what happens if you don't have harmony in your life, and maybe you've had that in the past, I don't know. Most of the time when you break your character, you completely change to the opposite way.

08:54 Samuel So if you are chill, yeah, on the weekend I'm on the boat, next week I do this and that. But suddenly you realize maybe on Sunday night, bullshit. My mom wanted this, I

should have to do this for Monday work, for this and that. You become really quick and sad. And you just tell yourself, okay, this, but this is actually the opposite side of you. This is the person that we most likely don't want to be all the time. Maybe in certain moments, but yeah. I don't know if it makes sense, if it fits to you, but this is how I mostly split it.

09:36 Samuel And also if you have bigger on the I can't start this one, I'm really sorry. Like finishness. So you fall to the dominant side and you just say, okay, let's get it done. I don't want to think about it, I just want to choose, I just want to go for it. And this is probably the side that you need most as an entrepreneur. Red was my least favorite color when I started four years ago. When my mentee that I had back then did the test with me, I was zero dominant, zero. Like I couldn't care less.

10:14 Samuel I didn't join when someone told me what to do or you have to do it in that way. That's the only way we do it. So the worst. There was no dominance in me to say, like, oh, okay, no, right? So, but you're really ausgewogen. Ausgewogen, balanced. So let's move forward to Jonas. Yeah. The builder. The builder. Yeah

10:38 Jonas I was actually surprised when I saw that. I didn't expect that much of dominance. You have a sound of it, right? Or something. No, not yet. Okay. Not yet. Actually, when I started a healthy, I was embracing just a random corporate variant, you know, like most people. Then I joined, yeah, Start Global, which is not proper startup but more network startup accelerator. Yeah, Start My Intermission Blur. I work with startup every day and now, yeah, I'm gonna work in a startup or be founder. It really changed my mind. So therefore.

11:13 Tiago Surprise me, but comment on that. He said he was surprised about the dominance. I was, I know him. I wasn't, but in a good way. Okay, like just a comment, then you continue, because I think it's interesting about him. We did a meeting to prepare this meeting, and we were going in every direction. And then it was shown to us, hey guys, let's keep focused. Let's do this. But not in a mean way, but in a nice way.

11:41 Jonas Yeah. Yeah, but that's true about me, like, my personality. Originally, I'm really, I'm still really curious, like, knowing every single thing on a subject I don't know anything about. But I really like the structure for, like, years, and then when I entered into V and also, like, Cycle Roll was like, yeah, no, you need some structure because then you gotta start 10 projects and nothing, because your focus won't be just on 1 or 2 projects, actually, to get shit done. And now I also gain these skills, which also now allow me to be way more productive and, yeah, get shit done. So where have you

12:22 Samuel Where did you come from? From the Châtel? So, okay. Born and raised in the Châtel. Born and raised? Yeah, also. No, actually

12:32 Jonas my grandmother is Belgian, but I don't know, I don't have a lot of influence from Belgian. I also lived a bit in the UK and worked with many Germans, which was also really good for a culture. Yeah, I really need to jump capsule because I don't have a side job, and so units are just too boring, so really looking for work for, like, some

12:58 Samuel Some real experience. Yeah, great. I think someone who's Paul, I wanted to ask you why were you the one reaching out to us? You were also a builder or not? Because of the screenshot you sent me.

13:12 Paul No, I think it was visionary, it said. I didn't notice I cut it off. Okay. Why I reached out

13:22 Samuel like you had to choose, right? And he's the most dominant, or what? How did you do it? Who becomes the, I don't know, captain of the T? How do you say, like, I think we just say, like, who wants to send? I just said, "I'll do it." Okay. No, but I'm really curious about your referendum also with the aviation thing I saw on LinkedIn.

13:44 Paul Yeah, in the end it wasn't that interesting. Basically, I just did cost calculation, and then I talked to the brokers that I chartered the flights to, and then to the officials that managed all the aviation. But, yeah, I would say it fits the profile because I had to be very conscientious there, because if I made a mistake, it may have cost a lot of money, because if you charter a flight, it quickly came into five digits, yeah.

14:29 Samuel Okay. But how, where do you come from in the end? I heard Austria. What's your background, and also, like, why are you at Hoskate today? Maybe, yeah, I'm from

14:44 Paul Regent in Austria. I don't know if you know the town. You've been there already? Yeah, my ex-girlfriend was from there.

15:01 Samuel However, it's a beautiful place, and I still are being in contact with the family because they are clients still today. So, oh, nice. We

15:12 Paul are in a good relationship, yeah. That's always great. I

15:16 Samuel guess Austrian people are really nice people, so I'd say

15:19 Paul so as well. Yeah, yeah. I went to the Handelsakademie business school in Bregenz, which I don't think an equivalent exists in Switzerland. It's just like the gymnasium, but with a very high focus on economics and business. And then I noticed there is there I liked that a lot, and then HSG was the next logical point to try to get in. It's not that easy as a foreigner, and then luckily I got in. Okay, nice. And what are your expectations? But you said luckily. What

16:00 Samuel did it need to get in?

16:02 Paul Foreigners have to do a special test to get admitted to the house game. So it was not luck, it was you. Yes, and it was. But I mean, luck is always a bit involved, depending on what questions are asked, how you feel on that specific day when the test is. Okay, more important

16:23 Samuel thing, we don't bet on luck in here. Never. I think if we work hard, we will be lucky. But I think it was hard work, 100%. You wanted it and you got it. Yeah, yeah. What is your expectation now

16:40 Paul From our project? From the capstone project. My expectation for myself would be that I've already been to Southeast Asia. I've talked to a lot of people there, and I claim that I understand at least a bit about the culture there. I hope that I can really make an impact and influence is a bad word, but do my part in the decision-making for your company. That's

17:15 Samuel great. I would like to start from hereafter to make a voice-over of the whole meeting. Is that okay for everyone? Yes

17:25 Tiago I can do as well. Yeah, I

17:27 Samuel mean, I will send you the summary if it helps for you guys, and we will have a drive and folders and stuff. But when it comes to the expectations and everything, yeah, this is also important from our side. Thank you very much for giving us that insight. We were happy to have someone who was already also in Asia. Yeah, the person on the laptop.

Yes. You hear me. I do my best to do so. Maybe we can make it a bit louder. Is it already the loudest? I think it's the loudest. Okay, yeah. Still like this. We're really all I'll try to agree.

18:09 Marius So yeah, my name is Marius. It's very nice to meet you. I'm not with you guys because I'm currently working. Maybe Joshua knows I'm with the Liechtenstein Gold Trust at the moment, so in banking as well. For a second time. A little about myself. I love cars, watches, everything I can afford right now, unfortunately. I'm passionate about the market, passionate about public markets, private markets, but I'm very happy to be able to broaden my mind here and get a little bit of insight into the start of Steam. I've never had that. I'm very interested, and I'm looking forward to, yeah, not influencing but doing my part in your business as well.

19:02 Marius So thank you so much for the opportunity, and yeah, let's get to it.

19:08 Samuel Really well spoken, man. The shape, not the magnets and magnets. I have a question. What's your hobby? I love skiing. I love going out with friends, love a drink as well. That's the yellow in you, huh? Basically the standard game

19:30 Marius of the last call. But yeah, basically just normal stuff. Your own sport, I don't think you do. But yeah, both golf and skiing is probably my top 2 hobbies, yes.

19:46 Samuel Did you ever choose a Freifach? Can we just translate this? Or do you mean like when you choose along the way from your, like, the schedule you have at school that you have to follow, but sometimes you can choose other topics to go into extracurriculars? Extra curricula, did you ever choose something in those times or not, when you had the chance to? I'm not sure if I know what you mean. During walk time. Is it like alongside school, like a sport or something? Usable, choosable topics. So I can't be turned by the way. Oh, hattest du schon mal ein Freifach gewählt während der Schule?

20:43 Marius If it wasn't mandatory, I probably didn't.

20:46 Samuel Okay, no, that's good to know because I didn't get the read I was looking for the read, but now I got it. Okay, great. That's good to me. And where do you live now? Currently, I live in Liechtenstein because I work in Liechtenstein and my parents live here. But from the 1st of October, I'll be back in Sankalan, so back to normal. I don't think. Great. Okay, we will meet you also. Okay, nice. Yes. Nice. What's your expectation on the project?

21:18 Samuel Like you mentioned a few things, but I would say based on your personal interests, what would you like to, if you could choose from all the things that you could do in a startup, what would you like to do?

21:35 Marius Well, so the obvious answer would be like, I spend a lot of time in extra PowerPoint at the moment, and I got pretty good at it. So this is only where I will see my strength. But I would get, I would love to get out of the box over it. But generally, I'm open and just happy to see something I haven't seen before as well.

22:05 Samuel Okay. Good. I think we can offer that as well. Yeah, sure. So you have no time for no, it's here actually. Nice done.

22:16 Ana Can you see it? Yes. Yeah. So I have a very low dominance, and that's a thing, like a very strong thing about me. I like free spaces where we can talk, where we can show our idea, and not like rules or this kind of dominance, so that's why very opposite from the from for the voice but very low. And I also like, I feel like I'm very influenced because I like talking, listening, and then understanding the other point of view and being able to show

my point of view also, and then we together we get to final solution or yeah. And that's why the magnet.

23:01 Ana I mean, Marius is also the magnet, but with a little bit more dominance, so I think we are different magnets and maybe a good combination in the future.

23:13 Samuel I don't know if you know, but you are most likely the multi-waiters in the group, huh? So when things are getting tough, we need the magnets to stick to the plan. Very nice. You grew up in Brazil?

23:30 Ana Yeah, I'm actually an exchange, so I'm here for the semester.

23:33 Samuel Okay, until when is the semester? February?

23:36 Ana Until Christmas.

23:38 Samuel Until Christmas. So once the capstone is finished, you got your credits as well and you're gonna fly back. And you're from where in Brazil? From Sao Paulo. Oh, nice. Very nice. Yes. Great. Hobbies?

23:52 Ana I like seeing my friends, doing yoga. I feel like sometimes it's what makes my mind go to a safe place, a calm place. And I always like to be surrounded by people, so family, friends, I like all these kinds of things that you can do with them.

24:13 Samuel Interactions. Interactions. Yes. Very nice. Yeah, I mean, I don't know, I had much, I didn't do anything with it. I'm sorry that you're the only girl in the group. Yeah. But actually I talked to Joshua, I was really happy about it because we were getting all the results from the tests and I saw a man age. And I'm so sorry for not sending it. No, all good. I mean, it's good for today. But I think you will have anyway a little bit of a different perspective on some stuff, especially if we look at the dominance in the group.

24:50 Samuel Group, I think one guy has a great idea, and we will follow that idea because we will be like, well, yeah, let's go. And maybe you can challenge us. But maybe all the time. I think that's a really important thing that you could do, especially because you don't have such a big dominance, which is a great thing today. So thank you for being in the team as well. So next Brazilian. Next Brazilian. We

25:18 Tiago have three Brazilians here. Which is now three. Now three. Yeah, not three. You're also Brazilian, right? I am Brazilian. You could be Brazilian as well. Oh yeah, he can hear it all the time. Belga. Alright. Same theory. No, okay, I'm Tiago. I'm Brazilian, half Brazilian, half German actually. I'm a bit like he said, when I started Heisge, I wasn't expecting it to be that corporate and that so like rigid. Like so no but corporate school in the right.

25:53 Tiago I know, but because when you look at how they sell the school, it's like, “Be innovative, think different,” all these things, and then you take your first test, and if you don't answer exactly like they want, you're out. Absolutely. And this is something that I find really frustrating. But I like the idea of starting a business. I like the idea of trying and experimenting and trying to do it different, and I think that's really nice. I'm also passionate about design. I love design. When I go home and have nothing to do, I'm just designing things. What are you designing?

26:43 Tiago I did the visual identity for a startup. Oh, now I'm helping out another friend with his logo. Okay, so more in the

26:53 Samuel InDesign. InDesign or Figma. And, oh, Figma, okay, yeah. You're on Figma. Okay. I got your phone, by the way. Thank you. That's epocentric, huh? Yeah. Really nice. That's some good skills as well.

27:09 Tiago But yeah, even my summaries. I sometimes need to study a subject that I don't like, and the only way to make me study it is by making a beautiful summary. Like making a well-thought-out summary and trying out a new way to design it. So I'm designing, but I'm studying as well. So yeah, that's me, and I love numbers, like finding statistics and analyzing market research and everything. I think that's interesting, to understand how people think and how they react to something and how to reach them, like how can we make the brand stand out to them compared to the competition.

27:50 Tiago So you look at the numbers: what do they do? How can we do it different? And I think that's, I can spend hours doing that. I love it. That's amazing.

28:02 Samuel That's amazing. We should start working in some motion then.

28:06 Tiago But I just have a question, by the way. Because Corsair and Samotion are different, but not that different. Like your Sammotion or your co-course, that's

28:18 Samuel No, I am both, but I think in life, in my life, as you just mentioned, you are creative and somehow you have to follow the system. So what do you do? You try yourself into the business schools or other schools. That's where we are today. But you also realize quickly in the personality of yourself, it's not the only thing that you have in you. And you have to follow a system to make it in the system. We live in a really Western world.

28:51 Samuel So I also like expensive things, but to be able to really not care, in my opinion, how expensive something is and what money is about, you need a system that works for you, you need a framework, and you need to somehow combine things that you don't like and that you like a lot. And this is what happened with Corsair. Corsair was something that was made up in my brain for many years, but I needed to wait to get to know Joshua 6 years ago to show me Italy. He showed me Italy in a way that I never saw Italy. I was in Italy, but trust me, I was not in Italy.

29:35 Samuel So there are many things coming together in Corsair. Corsair is the output of probably my life and soon our life as well. And Some Ocean is how I escaped, and I just wrote today a LinkedIn post, so maybe you can read that afterwards, how I escaped corporate life, but I didn't escape the system, so I still have to pay some bills that I don't want to pay, and I still have to follow some meetings that I don't want to be in. And I work with clients that I really don't like, but this is the motion. This is a creative agency.

30:14 Samuel Corsair, the beautiful thing is layered. Corsair has been built to a certain moment with one framework. And this is the framework you will get the presentation afterwards anyway. The framework that I personally would say, whatever personality you are, you're gonna be really successful. What I mean by successful is what I have done in the past 4 years. I was never thinking it would be possible. So whatever comes in the future, being able to work with you guys is the first time. Being able to work with High SK, not having been a student at High SK, is a dream coming true for me.

30:55 Samuel So trust me, I am really happy to be here and tell you that this framework worked for me to be here with you today. So I think it makes more sense to give you the same framework. And it's really easy. It's strategy, which you all have a lot of, and execution, which most people have more. Some people have more in here, and other people will

learn execution as well. And 2 things are really necessary for us in core, so that's why I wrote those 2 sentences. Execution needs teamship, so we need teamwork, and we have to be partners, partnership.

31:35 Samuel So the more teamship we have, the more we respect each other on the high level and talk really directly and give feedback, we will be in the middle in this circle between strategy and execution in a happy way. I think that's also really important. We want to be happy in here, we want to have a good mood. We will have tough times sometimes, maybe more, maybe less, but in the end we create a really cool product, and let's not think from this step bone too much. I think you are great in thinking and building concepts and axles and calculating, and I don't know what you have been through, but I've watched it on the website.

32:20 Samuel I try to understand what the bachelor thesis is about. And as much as I understood, it's very theory-based and not so much execution, and I think that's why Capstone is here to build this execution and back all the time. When you leave Capstone, I think this framework will work for you in the future as well, for whatever you do. So, however, Mr. Bergman Heiko, I think he told you a little bit about Corsa. You guys chose this project yourselves, right? From how many students? 25. 26 in total. 26, okay. So how many projects were presented then? It was 5 projects. 5 projects. Okay, so we are the only one with 6 people? Yes. No.

33:05 Tiago Oh, or they have some free people groups and stuff?

33:08 Samuel 27 students.

33:10 Tiago Oh, there was like one group within.

33:14 Samuel But was there a project that were not so many people interested, or was it like even to all of them? Was it even more than there was one that 3 of them

33:22 Ana was like more interested and then the rest, yeah

33:25 Paul But there were 2 projects from the same company, and 2 groups chose the same project of the company, but I think we figured it out. Okay, the

33:36 Tiago Better top one, and then I thought your visual density, that's what caught my eye. Like I was like, I really like... So I catch you visually? Yeah. How did you catch you? Yeah.

33:49 Samuel Too. Also visually, it's so it and...

33:52 Ana Also, like, very youth, so I, we felt, at least I felt part of the presentation, you know, like part of the customer and part of the idea that you were trying to expand. So really, my eyes put it by.

34:09 Matthieu What was it with you? It's what you do, basically, like the company itself. I liked it, so, and I like the project of trying to go somewhere else in Japan, which was nice. I felt like I felt something which I didn't feel with the others. So, like, still feeling...

34:29 Jonas Yeah, like I had a slight hesitation, and then, like, I also, like, compared to the project, I was like, yeah, being kind of funder associated in a B2B SaaS, like I'll have plenty of opportunities, but, like, that project, like outside of the capsule, must be really, like, hard together and maybe not find other source. Like, let's take the opportunity because that might be the only time I...

34:50 Paul Worked for me, it was very intriguing, the international expansion to Indonesia or to Southeast Asia in general. Great. And for you? And also visuals, and also Paul had...

35:09 Samuel A major impact because he was kind of my deputy for the KCOP event as well. Who was your deputy?

35:18 Paul Oh. Oh. He had to work and just said, “We do this.” Oh yes.

35:26 Samuel Beautiful. Okay, yeah, well then more than welcome to Corsa. This is the picture that I started creating, this idea of having those types of personalities in a concept. We have someone who's doing sports, someone who likes sports a lot, and someone who watches sports. And I think this is where and this eating ice cream. We didn't have a menu yet, but we will maybe have in the future.

35:54 Samuel However, this was my main idea, and we validated this in Zurich, in our first location, in our first pit stop. And it really had to be a pit stop, like a racing pit stop in Formula One. So everyone that doesn't watch Formula One or hasn't watched Formula One yet, please watch one race in the next 3 months to at least have the feeling of a Formula One race. And we had no space for a Formula One car. So we asked ourselves, what is the car? Microlino? Yes, exactly. So the Microlino, I got in talks to Micro through another, through Some Motion, with a client that we work for. So it's all really connected.

36:40 Samuel The visuals that you see, the visuals that were appealing to you, we did all by ourselves in Some Motion. There was no painter's picture involved or anything AI-built. Even the logo was my creative, how do you say, designer, creative designer. Yeah, Luna, I would love to meet her. Yeah, absolutely. She loves people, actually. And yeah, the slogans "Race, drink, eat, repeat" is maybe the one thing from ChatGPT. But apart from that, it's all built in the narrow company, the models, whatever you see visually, the T-shirts, which I have some here for you today as well. Oh, nice.

37:20 Samuel Yeah, I think the guy on the, where we end on the laptop, we'll get one as well. Just tell me your size. And you guys can choose it while we are talking. Yeah, try probably mine, right? And yeah, this is how we want to start feeling the concept because again, this pit stop doesn't exist anymore, otherwise we would have nothing lyric no matter what. But yeah, as we can make the concept here. We had it open for 3 months. We reached over 200,000 people that were walking through HB, some of them maybe twice, but this is what the calculations gave us from SVB. So we had over 50,000 people a day just passing the slow.

38:07 Samuel So we had a lot of awareness happening. The other thing was, and you see on the picture underneath, the second picture, is you have many Asian people with time showing up. And I didn't understand why so many Asians showed up. But we had a moment, I mean, Joshua and I, we were cooking on Sundays because we had to fire our first cook, who was absolutely not a good cook. However, we were cooking on a Sunday and suddenly there were 2 Asian couples, like a couple of Asians, showing up with 2 big pieces of luggage, and you saw the luggage priority, so you knew they were flying, I don't know, business or first or whatever.

38:53 Samuel They were coming to our store directly from the airport before checking into their hotel. I mean, they had a 12-hour flight. So they must be a little bit tired or had jet lag and stuff.

39:08 Samuel So the moment they checked into our pit stop, showing up as Asians, I knew we were going viral on TikTok in Asia and people were showing up to our place. And I mean, I sold marketing for a few years, but I sold this idea of, hey, dear client, it can happen, you

know, we can go viral, but it never happened to myself. And once that happened, I realized, okay, they really love it and we can become like the ramen here, the sushi here. People love exotic stuff that they can't have. So why don't we bring what they can't have to Asia? This was the main idea of Asia, not Jakarta yet, but Asia.

39:54 Samuel We do have many concepts in this world, more than ever, probably. We have many pop-ups, pop-ups. I mean, if you walk through Syrica, you will see many pop-ups all the time. And you can also eat fast, but in my opinion, not well. Maybe we have a concept like Kaisin, maybe you know Tiny Fish. Kaisin. I mean, in Tiny Fish you cannot sit down. In Kaisin not every sauce is healthy. So in the end you eat fast, but it's not really healthy. And this is what we want to change, of course. So they lack, most of the time, also functional nutrition. If you can have proteins and stuff, it's most of the time peanut butter.

40:40 Samuel It's some like if you go to Joe & The Juice, you will have a lot of sugar in your shakes, so is it really healthy? I don't know. And again, performance and lifestyle. Do you meet really like-minded people? Can we create a community that is not only showing up for a running event because it's really cool, that is actually showing up because they lack Corsa? And again, I wish you could feel it, but we have people, sporty people, showing up almost every week on the same day to eat this kind of nutritious, warm, and healthy pasta after a great high rock session or whatever.

41:23 Samuel So yeah, I already explained the problem, and you can go through that also by yourself. This is where we built a solution. You can feel course a little bit more on Instagram when you have the presentation. Click yourself through. And today we combine again pasta. We had 5 different pastas, which was the base identity.

41:45 Samuel We had great coffee as a daily ritual to bring back to the people, but we also had functional drinks. Maybe you know Gaya is a functional mushroom that we implemented in course as well. And one of the drinks that were a bit more emotionally connected to people was the corsalote, which was a hibiscus infusion that we made with a flat white. But you came up with a pink flat white, a pink drink, which they hadn't seen before, and it was not that hard of a coffee drink, so a little bit less on the coffee side, even though it was a flat white with the hibiscus and everything.

42:29 Samuel And a little bit of ruby chocolate, so just a small, tiny sweetener. To drink it in the morning, not feeling like you have to run to the toilet in the next 10 minutes. I mean, I think it happened to all of us drinking coffee. Really, yeah, in a happy mood, and 10 minutes later you're on the toilet and you should leave the house. Yeah, I don't know if you can hear it. You will have the video as well. Yeah.

43:00 Tiago Really, when it's almost been like keeping it tight for the one to go in the bottom, we stay right coming like an eye society. We touch my seat. But this agreement stayed, I'm speaking facts. Oh yeah, no, we're gonna stop this game.

43:33 Samuel Yes, I think that's all I can say to Corsa. Just that you guys know, for the following work, you have to really understand that we have a creative agency at our back. And this is something that is maybe not normal, but in terms of marketing, in terms of videos, in terms of activation, in terms of just marketing ideas, bring it up. We have the team to do that on the side while you guys are working on different topics. We are also not just here to tell you what to do.

44:08 Samuel We will work with you side by side and do those things that maybe you don't have experience in, or maybe you don't just don't want to do because it's not your strength, and we will really want to work with your strengths. Your mission is based in 3 different scopes and the strategic fit, which we are really convinced about Jakarta because of many reasons, but the validation you should do by yourself. I mean, if we tell you why we would go there or why it's the best idea, I don't think convincing someone comes by telling him a nice story. I think convincing someone is letting him feel the exact same thing.

44:51 Samuel And then he will talk with you

44:54 Tiago in the same way. Can I just ask a question about not I agree with you, I think it's better if we check later, not that she, without you saying why you, why it's the best fit according to you. But was Jakarta the first option, or like, when you decided you want to expand to go to another country? Was Jakarta the first idea or after you had to rule out a few options before deciding Jakarta?

45:26 Samuel So I was in many countries in Asia. I was never in Jakarta. I'm not saying it's the best fit. Okay, let's say it's a really good fit. I'm 100% sure it's a really good fit out of many reasons. But I was in Hong Kong, I was in Shanghai. As a startup, you also have to ask yourself how expensive should it be? And I think that's a really important question. And if we want to build this door from the very beginning with everything surrounded, and we go to Shanghai, we can also do it in Suri, it's the same price. It's the same price. But maybe not employees, but to build the thing.

46:06 Samuel And in Jakarta, we do have resources that are different. Indonesia has great coffee. I mean, this is a hint that I will give you today. It has great coffee, and the second thing is my personal network that I was able to build during the coarser times. So Indonesia is divided by five main families, and we do have some contact to one of the, I don't know if it's king families. I don't know if they, I think it's Kai Kaiser family.

46:35 Samuel So they have like five different main families where you have to go to. It's like the government, and one of them we're related and connected to, and this is why we see a great fit, and this is something you should know. So the second thing, the first two are like one topic: strategic fit and the business case itself. Again, you had a lot of theory in the past. You learned how to do those things. I think you are more than capable of doing so. And we're going to go through that as well later on.

47:10 Samuel But this is like the first fit for the next one and a half months, and then the third part is the 90-day roadmap in general. To keep that in mind, we are focusing on a much bigger goal, which Joshua will tell you about now.

47:27 Joshua Yes, so we're going to split the whole group in two for the first part. So there's Pair A and B.

47:39 Joshua Pair A is focusing until the 22nd of October more on the market entry, so everything that has to do with the competitor landscape, benchmarks, analyzing the whole Jakarta, Indonesia landscape will be there. And then you have the business and finance case that you're doing, like a finance model. It can be really easy in Excel. Heard some guys are really Excel lovers, so yes, this is for you guys. And the goal is to do the business draft that you have to present then in a short presentation on the 22nd of October, like 12 to 15 minutes.

48:36 Joshua I hope you have this thing in mind, that the PDF with the dates from HISNED up, yeah? We okay? So in the middle, we thought, like, okay, while we don't need once, like, this is just a proposal, like the 9th of October. So I think then we still have enough time to review what we have and then maybe improve it so you're ready for the presentation. And yes, so here.

49:16 Samuel Well, actually, you have to fulfill, I think, a proposal in the right proposals, and we did some homework to do that, to give you guys more time because I think what we will send you is already somehow the proposal because we thought if we don't give you a proper proposal, you lose so much unnecessary time. I mean, this step again is corporate. It's the perfect example of, yeah, let's meet in 2 weeks. So we did the proposal from the very beginning. Of course, you can finalize it.

49:49 Samuel Of course, you have to maybe put your vision to that, but I think you will, you don't need what is today, you don't need like a week on a proposal. It's already done. Maybe you can have more time for how you want to structure the strategic fit and the financial fit, maybe put that in the proposal so that this is ready by the end of September. Maybe, yes, just to add that. Because this we want to get rid of. We want to know how we work, in what teams we work, and I don't think we need until the 9th of October to do

50:28 Matthieu 'Cause I think it's the 25th of October, so this, right? No, 25th of September, we have to lead the project work with them. Oh, really? Friday. No, it this was

50:38 Paul Wrong.

50:41 Samuel Okay, sorry. All good. Okay. This is done with ChatGPT Astra, and I combined all the information from us and from you guys. So if you find any things, could be that something is not right, maybe something that was spoken. No, we improved it, and after, I guess

51:01 Joshua We improved it, that's for sure. Yeah. So I think the handout we have for you, we'll go deeper in these topics. So this is just like a short review or a preview. And yes. So from the personalities in here, who would you choose for A

51:24 Samuel And B? I have to add one thing, please, in pair B finance. Even if this person is sick of it, maybe, but I would like to have one, like the best person in finance, I would like to have in pair B. I mean, someone is working in banking. Who's the most? I mean, in the end, yeah, I said it's completely fine. Oh, completely fine. Oh, sorry, I understood something else. Okay. Great, thank you. Good, then we have someone in B, so let's split it.

52:06 Tiago I need to say I'm really into A. Okay.

52:17 Ana Yeah, I think I would also prefer it very

52:21 Samuel Simple. Okay. The question is if it suits the others. Yeah, but also

52:30 Tiago We can discuss as well. Yeah. I'm

52:35 Samuel I think for me it's fine. To be and be? Or okay. Yeah. And for you as well. But

52:42 Joshua He knows a lot about the chocolate culture. You need to be in A.

52:48 Samuel I really be in A. Difficult. Aber warten wir, wieso machen wir in 4-2?

52:56 Tiago We could also, like, if I made, we can do two and then we have two people that are binding the things, like the pairing that's really critical.

53:07 Jonas Yeah, like if there's a bottleneck somewhere, we can also, like, maybe look at more resources when, like, maybe one group stores a bit, like

53:15 Samuel I can tell you in this way we will have four people that think two are not doing enough.

53:21 Tiago No, like, for me, sorry. Yeah. No, for me, like, I have a lot of time. I don't have many classes. So I don't mind spending my time doing research, and I know some people have more credits this semester and they cannot do more. I mean, I think it's unfair to ask another person to do as much as I am doing since I have more time and I like doing it. Like, I think every sometimes, like, someone can work one hour and do as much as I do in two. And it's not because they are working less, it's just they're working differently. Of course.

53:56 Tiago From my perspective, I don't mind if someone seems to be working less as long as the work is done at the end. Of

54:04 Samuel course, yeah. Well, I mean, your personality is actually the type that would suit both sides, right? So maybe if you jump between them, it could help. As a consultant. As a consultant. Because you have a lot of experience, though, that the others don't have in real life. So I think that helps. That's why I also see you in group A. Yeah. Yeah

54:28 Matthieu I would see me in group A personally, but as I said, like, I prefer to be flexible and trying to learn more about the science part, and it would be great for me as well. But if you say that we could do, like, two and three, yeah, and I would be the one jumping outside.

54:51 Samuel What do you guys think? Group B, you are a bit smaller than the other group, but to be smaller is more efficient sometimes. And you guys, I think you speak the same language. Us too. Yeah. What do you think? Because I really...

55:17 Jonas B would be more challenging, but I've already done a bit of forecasting, like financial forecasting for restaurants. I would have more skills to learn, but actually, the thing I will challenge is that I think I may have more strength in P&L, but I'm willing to learn, and I've already skipped, so if there's room for that, I would feel too. Okay. So who's in group A?

55:47 Tiago I, if I didn't, if I need to be R, yeah. Thank you. I'm

55:53 Samuel not, yeah, with one N or two? Yeah, one angle. Der Jonas ist der Jumper mit der Mathe. Oder? Aber nicht Jumper, das ist auch ein geiler beside me. Springers and Choppers. Midfielders.

56:17 Paul Midfielders. Okay.

56:21 Tiago Knights. Knight is good. I'm

56:25 Samuel looking for the racing work for you. Group B? I mean, I was not thinking about it, but why not? So we have Paul and Marius? Nein, Paul muss unbedingt ein Ziel. Ja, dann ist er der Springen. Ja, dann erfähr er den zweiten Springen. Das ist schon scheiße.

56:50 Tiago But at the end of the day, it doesn't mean that if you're in group B, you're not aware of what's going on in group A, or is she

56:58 Samuel not an issue? You wanted to learn new things, you said. But actually, yeah, I'm, we'll have the second

57:04 Joshua phase. We have the second phase.

57:09 Samuel Second phase. Is that written down? Yeah. Perfect. Midfielder, the Bellingham here, and so Paul and Marius, right, following sound isn't cool

57:28 Joshua No, so. Something? Yeah, this is a little bit power. Power. Oh yes. And score. We buy die in our woo. Nice. I think the finance part is really smaller from the effort you need to do. Okay, but then

57:49 Samuel Paul, you become the midfielder, sorry. He has so much experience in finance. And I can tell that Paul and Marius, like, I think you really speak the same language. Okay, does that make sense for everyone? Sorry, in the case. Yeah, it is great. Okay, great. Alright. So moving on, which is for us expectation-wise. Yeah. Expectation-wise, I think that's important. We need to have some evidence and validation. And this is what you've learned. I don't think we give you something really new here. It's just a different topic, and it's in the real world. Absolutely.

58:27 Samuel If you want to do interviews, if you want to make some subtle assumptions, and if you have uncertainty, feel free to talk to me about those things, about how you feel in the group, how you would like to proceed. Maybe you need a network contact. That's maybe the biggest thing I forgot to say. We are, in my opinion, really well connected. I think you guys as well together, which are probably over a thousand contacts each, so we have over ten thousand because I know how many I have, so we have over ten thousand contacts that we could reach out to. There's never, “We don't know this certain person.” Never.

59:10 Samuel Maybe we're one call away from this person, or maybe we have this person in our contact list. So please always tell Sam. We will have a group chat, and I want that this group chat is used. Not for everything, but, like, at Sam, you can mark people, right? Use that function. Write us whatever you have. Because until the 22nd of October, it's, first of all, in my opinion, the easiest job for all of us to convince the professor, to convince everyone surrounded in the project, to get the credits done, to not invest too much time. Maybe some have more time. Thank you very much, of course. Someone has more time, why not?

59:54 Samuel Feel free to call me on a Saturday or a Sunday. I don't care. But just any

1:00:03 Joshua So in the first phase, maybe go back, you are like official consultants, like maybe McKinsey, Boston Consulting Group, ECG, whatever. And in the second phase, you are more like visionaries. So entrepreneurs. Entrepreneurs. So think about, I don't know, let's say mosque. So you need to think about how would be like the location in a few years with all this innovation that is now happening. So if we start now to use the same principles of our machinery or whatever we do now, in one or two or three or five years, we're gonna be like very old school, really

1:00:52 Samuel old kitchen, cooks, everything. People in the service running around, burning their hands.

1:00:58 Joshua Processes, everything. So we are just the next boring franchise. The next boring pop-up. Yes. So we fought a lot about that, and that's why we want to introduce it here. So you can really go crazy here about the ideas, and we just put some ideas here. So one will be like requirements in the future, like, are there around some innovations in food tech or customer behaviors, or I don't know, some predictions or some knowledge you have, or some visions you want to share, and this will be like Pair A. And then we have Pair B. Like, is there anything about robotics or I don't know, like

1:01:50 Samuel I mean, maybe someone has seen the Cybercab from Elon, so are there really drivers delivering food in the future? What can we build to really, I would say, stay above a restaurant? In the future, we need to be number one in food logistics and in food tech because then we can really have an advantage on the market and be like, oh, you have this API, oh, you do that, oh, no problem. How fast do we need to be in the kitchen? 2 minutes? 1 minute?

1:02:25 Samuel The question is how fast are we in delivering the food from A to B until you guys can learn and the delivery guy is on time or the drone is flying your food maybe to your balcony. Whatever. You're gonna find cool things that exist. We just talked about it in the car, it has never been a better timing for those things. I mean, there was McDonald's 10 years ago trying to implement robots, but it was not possible. AI was not there yet. We had bigger companies that didn't share their expertise, like Google and OpenAI and all the others that came from nothing like Perplexity or others. So you will find a few things in physical AI.

1:03:12 Samuel How can we implement AI with something physical as an output or along the way to become physical? And Pair C is all about that kitchen automation and feasibility. I've seen robots cooking by themselves, and you will find them. But what can we do with them? The question is not, can we put a robot into a kitchen? There are people doing that already. But how can we build a system that works in every country that has this technology? I'm sorry.

1:03:45 Tiago It might have an idea. For the drink side, though, if, like you said, you thought about AI robots and everything, what if you used to have a menu, right, with pretty predefined options? Yeah. And the ingredients you use in those are basically the same ingredients. Some drinks have another plus one, but the basis is almost the same, right? Yeah. In other contexts, what I saw is that people tend to be more and more interested in personalized service. Something that is tailored to you and makes you write it down now. But, like, for example, this summer I was in Italy and I created my perfume.

1:04:29 Tiago And I'm the only one in the world that has this perfume, so it's mine, right? You could have the idea to have, like, my drink, and then you can share it. Share it on social media, and people get like, “Oh, that's your drink. Mine's better.” Or, like, “Let's compete,” and let's share my drink. And so, like, we can build an app.

1:04:53 Samuel With a profile, and you can see. And then people

1:04:55 Tiago with an AI, like, say, “Hey, I'm tired or I want to drink something that gives me energy, but I don't like that.” He

1:05:01 Samuel already knows that you don't like it, maybe. Yeah. Come

1:05:03 Tiago to Corsa.

1:05:05 Samuel Come to Corsa. Great. Write down that idea, and this is what we need there. And this is something that we keep open, guys. We keep it open, but we have to fulfill a very quick meeting. I would say before the 12th of November or maybe shortly in October, like 8 days later or beginning in the starting week, to not lose again. We will open the window, but then we have to choose where to get traffic from. We don't want to have all kinds of, yeah, air flows in our room. We want the right one, and we want to split into 3 teams.

1:05:45 Samuel And I'm not inviting, but I will go to Indonesia in November. Unless we get a crazy investor until that day, I would leave the option open to come with me to fulfill interviews

or whatever you guys are interested in. We will meet a beautiful, like, crazy network, that's for sure. But it would be your choice and then your costs if you want to do that. The beautiful thing about Indonesia is it's not that expensive. But if you have thought about, I don't know, a mix between vacations and actually entrepreneur holidays, because every holiday for me is like that. I cannot just enjoy 2 weeks at the beach and do nothing.

1:06:30 Samuel We always connect somehow with work, and we will do that in November. We were invited by this family to visit Bali. They really want us to see Bali. I don't like the idea or the place Bali in general. It's too touristic for me. I don't know if we would survive with Corsa in a place where you don't have tourism the next day, like Corona, but again, that's why we are in Jakarta. However, she wants us, she wants me to see Bali. She said, "You cannot build something in Indonesia without being in Bali," so I said my co-founder was there 2 times. Yeah. But it was not enough for her. So I will be there anyway.

1:07:15 Samuel And yeah, in Jakarta as well. Maybe for a week, maybe 2, something like that. So feel free to think about going to Indonesia in November. Do you have the dates, by the way? Yes, because we do have examples. I mean, we don't have proper dates. The son of the family is getting married, so the mother is really stressed, but she's the head of the family office, so I will rely on her. It will be flexible timing, but I think after the 28th of October, the marriage is done, and she said the first week, first 2 weeks in November.

1:07:56 Samuel I also said we work together with RSK, and we have to do it somewhere in between there to build those discussions and about findings in food tech, in food logistics, in physical AI. We have to find at least, like, 3 topics to follow. Why? I know you guys have a final presentation on the 11th of December. I know someone is leaving to Brazil again. I don't know when, but you're gonna be there before Christmas, I'm sure. No? Yeah. You're not going before Christmas? No. My parents

1:08:30 Ana are maybe coming, but I'm not gonna be

1:08:32 Samuel There. Then we're not in a hurry because Haiko told me to think about presenting on the 18th of December. So you still have a week later, I think, some kind of school and some things to do. If nobody is on holidays, I would like to do it on the 11th. If we guys can on the 11th, if nobody's on holidays, we can maybe expand it to the 18th. But maybe I will Zoom on the 18th, and I don't know. I would like to be part, so something like the 11th would be great. We are a bit flexible.

1:09:11 Samuel This everyone told me, so yeah, you guys are gonna have, in my opinion, a great presentation about the future business to go. We understand the fundamentals until the 22nd of October, and then we have this entrepreneurship program that everyone wants. And I hope you can find each other in the groups. There's a really easy answer if we don't make it, like if we don't build the groups because we need those types of groups, we're gonna put it all together and you work together on the project. So yeah, I hope it helps, but those 3 topics we cannot change. What did we write there? Yeah, just this before the 11th presentation report.

1:09:54 Samuel It says people. I didn't get that from the timeline document from How Escape. I think you have to write between 20 and 30 pages together. Yes. Not each of you. No. Could. So forget the PP there per person. And you have, there's something with a video? Yeah

1:10:12 Jonas Now it's a bit, it was a video to present, and now, like, you're completely free what you want to do. So if you want to be creative and do something else, you can do, but the standard was, yeah, feel free, you can do whatever you want.

1:10:23 Joshua Guys, so if you want to do a video.

1:10:30 Tiago About going to Jakarta, I would be really interested. I think he was as well. But Jonas and I, we have an exam on the 13th of November. How likely is it in person? Yeah, how likely is it? And I think you

1:10:46 Samuel get an excuse if it's for the CAPS, though.

1:10:49 Jonas I can do it next week, or no, I...

1:10:55 Tiago I could drop the quiz to go to Jakarta, but how likely is it? But it's like I've dropped it once, so I can drop it again. But how likely is it that we go after the 14th?

1:11:15 Samuel Well, I don't think it's... I think it will be for that. Maybe we can be back before that. So maybe you can combine Jakarta with a bit of learning in the morning and, again, meeting the right people, network interviews, whatever. My idea was to at least have interviews made in Jakarta with business owners, and we will get connected with business owners. So whatever we need. Maybe a bit more before the 22nd. Maybe let's see. I will prepare and come back to you guys as well. So we can make a small board on what we need from this and the next family, and she will provide it for us, yeah.

1:11:59 Samuel Because she probably is also an investor and maybe the connector of one of the biggest ambassadors possible in Asia. So, yeah, we work really close with this family.

1:12:10 Tiago Yeah, Heiko told us about an influencer that you... Is it this person? Yes.

1:12:33 Joshua So...

1:12:43 Samuel She's an actor. She's an actor. She's one of the biggest actors in Asia. She's Indonesian. She lives in Jakarta. I didn't know her when I had the idea of Jakarta. And, yeah, let's see what is possible. Let's see what is possible. I think to convince people like that to your business, you don't need the numbers and all those things; you need trust. And how can we build trust? We show up. And we just say hello. Again, no pressure. No pressure. She has to like us. Me, him, whatever, the concept. We don't need to convince anyone. We just provide the future and great food.

1:13:25 Samuel And I think if we are able to do that, people like that, and if it maybe it's not her, maybe it's her cousin, maybe it's the younger brother, the future, other actors coming up. Who knows? But we will be keen on bringing the right sponsors and ambassadors like White Manwell and Nicolino that we had in the past. Today my agency is growing. We have nicer clients. We have Cadillac as a client. Cadillac now has a Formula One team. So let's see where it goes and let's focus on our scope. And I think we...

1:14:03 Joshua By the way, we still have the Micro Elo, we have a second one. It's a great one. And, yeah, we're still using it. Yeah, until 18th of October.

1:14:12 Samuel You can write it in Zurich until I... Yeah, I mean, meet us in Zurich, guys. Zurich is our city. Whenever you're in Zurich, let's do the next meeting in... I would love to, I don't know. I was not... I don't know, like, we really wanted to be here and to not take away too much time, but... Okay, wait. The first meeting is always the most important. I think Heiko will hate me for not showing up now. But yeah, however, I think we're almost done. Last

thing, keep that in mind as well. Don't necessarily agree with us. We are not the most stupid people, that's for sure, but we're not always right.

1:14:58 Samuel And challenge us. Challenge us. Challenge the group. Challenge the boys in here when we are not around, please. If someone is too, how do you say it, fogado? Oh, bossy. If someone is too bossy, please let's put them down again. And yeah, we're looking for people who will challenge us as well. And I think we met the right people.

1:15:23 Samuel I love your profiles. I love what you did in the past. I wrote Joshua yesterday when you sent the LinkedIn profiles, when everyone was coming in like this, I was like, "Oh my God, nice, this one is working there. Oh my God, nice, how do we get in touch with those people?" But again, what you create is maybe appealing to other people, and yeah, let's build a great group. So thank you very much, guys. Let's work. Oh, really nice. We will send you the following.

1:16:13 Samuel I have...

1:16:13 Tiago We have a WhatsApp group if you want to join.

1:16:17 Samuel Great, yeah, let's, yeah, invite us also to that afterwards. We will send you the scope. Again, this is probably the proposal from us to you. So I think with that proposal, if you do the right wording and adjust it a little bit, you will have the proposal ready. Again, we don't want to have questions today. So this is 17 pages long. I think you can shorten it down to 6 pages. And yeah, let us know if you have questions. Let us know what is unclear. You have everything between final deliverables until the dates that we just discussed. Maybe that's not necessary to be in because it's written somewhere else in the presentation.

1:17:00 Samuel And we have some success definitions. I mean, we have a beautiful, clear scope in the beginning of the project, but in the half, in the other half, what is really success? I don't think we built it robot through with the biggest Chinese companies, but we wrote it down, and our goal is to define the future, to build a concept around CORSA that is useful. So, yeah, that's all. Do you have any questions, right?

1:17:29 Paul Now? Well, yes, one general question, because the first Southeast Asian country I thought of when your project was presented in the course was the Philippines. Because they... Why? Really? Why Philippines, sorry. When I was in the Philippines, I noticed was there with Filipinos, and they love Western food, especially European food. They love fast food. Really, every second building is a fast food joint. And they really aspire to European culture.

1:18:22 Samuel I think you will find it here in the scope, including competitor and strategic fit, and when we go down here, yeah, also other locations. We're really open.

1:18:34 Joshua For, yeah, every location, yeah. If you find some aliens that is better, Philippines means like Philippines is better than Jakarta or whatever, so you can also present this evidence and pitch it, so, hey, Philippines sounds great.

1:18:52 Samuel As well. We have a market research here and a strategic interpretation. Again, you can challenge it. We work for Jakarta because of the network mainly, and because of, I think, for sure, having the same abilities like in Philippines and Jakarta is now the biggest city in the world, bigger than Tokyo in terms of population. So over 40 million, and they can't count it right now. So this is maybe why we're going there, and a little bit more modern, I would say, than the Philippines. I've never been. Yeah, challenge it. Challenge it,

absolutely. If you have, this is the input we need. That's why you're more likely in group A as a midfielder in group B.

1:19:45 Samuel Yes. Any other questions? Yeah, I've talked so much. I've talked too much. No! No, I

1:19:54 Tiago I did some research already. Some numbers. But I think Jakarta, I mean, in Indonesia, the type of food, most of it is Asian, of course. But when you look, pizza is the revenue generated by only pizza is almost the same as European food. And it's Italian, right? So pasta, I think it's going in the same direction, and, like, the amount spent on one order on a delivery app, that's for later. But can you just show, of course, in France, that's

1:20:32 Samuel what amount of money is spent on one order on a food delivery app in Indonesia as of April. It was just to compare

1:20:38 Tiago like with the prices you charge in Zurich. But the interesting thing for me, the interesting thing was like this: in the top brands, most of them are European fast food, and the only real contenders to course up that ice up for now are this in red, which have drinks, but totally different from what you do, so you can be better. And this here, you check the point for what interests people. It's like healthy, avoiding artificial flavors, avoiding plastic and everything.

1:21:23 Samuel I can tell he already did a lot of the work that we thought to present to you, but that's great. I can tell in this group it will be most difficult to have the beside my communication. I think that's really important. We have people that are really fast moving forward. We have people that are more likely to have to sit back and compare all the things, which are great strengths. Nobody's wrong or right, or whatever, or you all are gonna be right in the end. But I hope you guys find a way of communicating with each other. I don't know how that's gonna work, but this is on you.

1:22:03 Samuel I can tell we have a WhatsApp group, but maybe that's not enough. I would like to schedule a call, but trust me, those calls will be short, less than half an hour, because after half an hour you lose yourself. So I try to have team meetings within half an hour on the most important topics because you are old enough and you have more than enough support. You are a really big group to find it out yourself. You have to find it out yourself. We would love to do it for you, but otherwise you're not gonna learn. So yeah.

1:22:41 Tiago Can I ask one question about your targets? Who is the customer? Like, your targeting? Like, when you think about it, I don't think we're gonna answer this question. No. Okay, we define, so, like, you, for now, we find out. Okay. You will find out. I'm just saying.

1:22:59 Samuel My dream is one day to have a pit stop on the racing one, on the racing track. I think that would be great. I think if we would be the kitchen of Cadillac, of Ferrari, of whoever, and then Lewis Hamilton is eating our pasta, or maybe not him because he's too old, so let's take Antonelli. Yeah, would be nice. Would be nice. So this is maybe my target. But the rest is homework. All right, so let's keep up. Next meeting is, I think we have the proposal that you have to prepare until UXC. You said something of 25, 20. 30, okay, so we gave you the proposal. 30th is 7 days.

1:23:47 Samuel I think that's an already tight timeline because every one of you has another life as well. So I would say try to provide the proposal on the 29th at launch to us. So at least we can have an overview, we can look through it, we can adjust maybe some things, give

you feedback, and one person has to do it maybe on the 30th. What is the 30th? Until 6. So you have another whole day to adjust the small things and provide this proposal. Tiago, I see you are a really visual guy and really creative with Figma.

1:24:29 Samuel I think it would help once the proposal is ready maybe to do something visually from that, just if it helps to everyone. Of course. Or maybe to build a title or something in between or an addition to something. Nobody says, again, here, this is totally to completely corporate free to 6 pages. I don't think that you get a worse degree if you make it 7 pages. I don't know. But if you have another edition, if you have an on home, an additional paper, put it in. So

1:25:07 Jonas Yeah, we can also type.

1:25:09 Samuel Yeah, we don't ask you now. We have to go to the... Do you have a

1:25:12 Jonas Big bar, any other platform or software, like already use CIs, so we can also use them to have, like, really... That would be amazing to have, like, the

1:25:20 Samuel Visual elements. I can provide you a lot of things. We have a CI/CD, of course. I work with Canva. You don't have to like Canva, it doesn't matter for me. What we have is, we have here Corsair design, we have our CI/CD, and I think apart from that, you, I would really like to have this one. Of course you will get some identity. I don't know what that is. Yeah, whatever, you will have a lot of things: colour codes, fonts and licenses, our logos in monogram, wordmark, no tagline, primary with the slogan, without the slogan, so from A to B in every color should, it's impossible. So yeah, we'll have that.

1:26:14 Tiago I have it. She is. She uploaded the things in the Drive, right? It's crazy. Like, I do it like that, but I've never seen it, even in other companies, like so structured and like everything is there. Everything.

1:26:30 Samuel Yeah, I mean, we come from creativeness. Yeah. One thing I had to do right here. Do you do internships as well? Yes, we do. We do, actually. Next year. February next year. So everyone has a shirt or not? What do you wear? Just

1:26:48 Joshua L Pixel. It's too big. It's even, it's a bit too big for it, you know.

1:26:54 Samuel Okay. It's, yeah, L. You have one. What's your size? Probably M? How big are you? Like, how tall?

1:27:03 Marius 1.86, button is on

1:27:06 Samuel Perfect. M is ish perfect fit in with 81. Okay, here's an M. I think we have, I need a remaining shirt because I was calculating more. You too? Okay, great. Yeah. So we have M. Actually, M was the one I wore all the time. It's the only one left with one red spot from the go salatte. But we have also a clean one, a new one. Which one would you like? I don't know. I give you both. I give you both. But this is like my proper one here. So I give you both. One is for Heiko, the OG. And one you need two at least.

1:27:45 Samuel Do you want us to give it to Heiko or we go to him now, and if we don't meet him here, we meet him next time. What did we say when we meet again? Sorry.

1:27:59 Tiago On the, we said 29th, right? 29th. Oh

1:28:04 Joshua We can do it. We can do it in Zurich.

1:28:08 Samuel But the 29th is the system. What type of the, like, T-shirt, okay.

1:28:15 Joshua No, 29 is just for so you can share your proposal?

1:28:20 Samuel Maybe we can do it on the

1:28:22 Tiago First, maybe. So, will you have time to look at our proposal as well?

1:28:26 Samuel No, we look at your proposal on the 29th. Oh, okay, then let's do it. On the 30th you give the proposal, no? So we sit together and start work on the 1st. On the 1st. So Thursday, the 1st of October. Would that be good for everyone? I would say in the afternoon in Zurich. We can also meet at like 4 or 5 p.m. That would be great. Yeah? First, this is the first day that I'm on weekly three. That's perfect. Okay, and you work in LGT in Zurich? No, things are gone. But I only work until Wednesday. Okay. So we meet on Thursday the 1st at 5 p.m.

1:29:09 Samuel We will send you the location. Paul, could you put me in the group chat and make me an admin so we can put you as well in the group chat?

1:29:20 Tiago You're an admin already, right? Okay.

1:29:24 Samuel And everyone send your names. We didn't save your numbers. So maybe send your names, and apart from that we will send you maybe some further stuff. And just a quick question

1:29:36 Tiago what do you think about doing like a WhatsApp community kind of thing? So, like, we have a group for group A, a group for group B, and then like a channel. Oh yeah, we stay in the same group. Yeah, no, you know, it's a group. It's like a community, so you can access every group, but like you have like a group A, group B, and then like a general chat. So we can try, but we have the midfield

1:30:01 Samuel We can try. We will see. We will see.
